SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID  
will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
  cast(BookID as varchar(6))
  + '.'
  + cast(ChapterID as varchar(6))
)
FROM   Bible..Scripture
Another SQL statement
```

```
; with cte
(
  BookID
  , ChapterID
)
as
(
  select distinct BookID, ChapterID
  FROM   Bible..Scripture
)
select cnt = count(*)
from   cte
The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_ChapterIDSequence\_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)  
will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID  
is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from [Genesis 1:1](#), and ending at [Revelation 22:21](#). The SQL statement

SELECT COUNT(\*) FROM Bible..Scripture  
will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_VerseIDSequence\_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)  
will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

ALTER TABLE Bible..Scripture  
ADD CONSTRAINT AK\_Scripture\_VerseIDSequence UNIQUE (VerseIDSequence)  
is supplementary.

The Scripture\_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

| ScriptureReference | BibleReference |
|--------------------|----------------|
| John 1:1           | 43001001       |

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

}
```

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns / SoC](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Huxell](#), who will talk of each word's specifics, and [Chuck Hader](#), who noted that the first occurrence of the word, [law](#), is in ([Leviticus 22:2](#)). The exact table, is a holding area, for staying information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning floor ([Joshua 15:3](#)).  
2026-03-30T11:30:00 I will assist if life doesn't share us apart... spread us apart (Genesis 1:16)? Heikai or Helek translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
is for determining the highest value. The SQL statement
```

```
SELECT COUNT(BibleWord) FROM Bible..Exact
is for determining the word count. The SQL statement
```

|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| Interval Scales | An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.                                                                                                                                       | Date difference, UNIX epoch?           |
| Ratio Scales    | These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit. | • HTML input range<br>• CSS percentage |

|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Point query        | It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.                                                                                                         | Useful for searching for a particular verse.                                                                                                                                                                                | SELECT *<br>FROM Bible..Scripture_View<br>WHERE VerseIDSequence = 1                                                                                                                                                  |
| Multipoint query   | It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.                                                                     | Useful for searching for a particular chapter or book.                                                                                                                                                                      | SELECT *<br>FROM Bible..Scripture_View<br>WHERE ChapterIDSequence = 1                                                                                                                                                |
| Range query        | It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound. | Useful for searching for consecutive verses, chapters or books.                                                                                                                                                             | SELECT *<br>FROM Bible..Scripture_View<br>WHERE VerseIDSequence BETWEEN 1 AND 10<br>)<br>SELECT *<br>FROM Bible..Scripture_View<br>WHERE VerseIDSequence <= 5                                                        |
| Prefix match query | The set is the match of an attribute.                                                                                                                                                                                   | The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries. | SELECT *<br>FROM Bible..Scripture_View<br>WHERE KingJamesVersion LIKE<br>(<br>SELECT TOP 1 KingJamesVersion<br>FROM Bible..Scripture_View<br>GROUP BY KingJamesVersion<br>ORDER BY COUNT(KingJamesVersion) DESC<br>) |
| Extremal query     | It returns either the minimum or maximum extreme.                                                                                                                                                                       | Statistics                                                                                                                                                                                                                  | SELECT *<br>FROM Bible..Scripture_View<br>WHERE VerseIDSequence =<br>(<br>SELECT MAX( VerseIDSequence )<br>FROM Bible..Scripture_View<br>)                                                                           |
| Ordering query     | The records returned are sorted.                                                                                                                                                                                        | The results of the author are normally in ascending order.                                                                                                                                                                  | SELECT TOP 10 *<br>FROM Bible..Scripture_View<br>ORDER BY VerseIDSequence DESC                                                                                                                                       |
| Grouping query     | The records returned are grouped.                                                                                                                                                                                       | Rarely does the author group rows by issuing the group by clause.                                                                                                                                                           | SELECT BookGroup, COUNT(BookGroup ) BookGroupVersesCount<br>FROM Bible..Scripture_View<br>GROUP BY BookGroup<br>ORDER BY BookGroup                                                                                   |
| Equi-join query    | The records are retrieved from multiple sources.                                                                                                                                                                        | The author uses views for table joins.                                                                                                                                                                                      |                                                                                                                                                                                                                      |

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
- Principle 2: Check Assumptions
- This whole thing started with keeping a work reference.
  - Even though Yoruba is the native language of the author, he still and invariably relies on translate.google.com.
  - The author depends on a typing assistant.
- Principle 3: Explore Contexts
- Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
- Principle 4: Anticipate Risks
- The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
  - Hardware, software, or network failure
  - Vendor withdrawal of support
- Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
  - Inability to restore deprecated Microsoft SQL Server backup versions.
  - Command-line reverse-engineering of database script does not conform with the newly released data types.
- Principle 5: Assign Priorities
- The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
- Principle 6: Define Time Horizon
- What period has God used?
- In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium (Numbers 1:3, Luke 2:42).
  - On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium (Numbers 4:30, Matthew 7:16).
  - In the year 2007 — generation time span: this masturbation will bring water. My 40th year (Numbers 14:33-34, Numbers 32:13).
- Principle 7: Generate Multiple Solution Options
- How versatile am I... at amending others? I have to relay my negation to technology providers.
- Principle 8: Design Around Constraints
- Relational databases offer the ability to set constraints.
- Microsoft:
- Data type
  - Nullable
  - Primary key and unique index
  - Foreign key
- Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
  - The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
  1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most

- Autobiography

prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.  
2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

| Statement             | Commentary                                                                                   |
|-----------------------|----------------------------------------------------------------------------------------------|
| sp_databases          | The sole work of the author, the WordEngineering database size, is currently 33390528 bytes. |
| sp_server_info        | The database version is Microsoft SQL Server 2025 - 17.0.1115.1                              |
| sp_spaceused          | The WordEngineering database currently uses 32607.94 MB.                                     |
| sp_statistics HisWord | The cardinality of the HisWord table is 122966.                                              |
| xp_fixeddrives        | Returns a list of physical hard drives and the amount of free space on each one.             |
| xp_msver              | Returns version information about SQL Server.                                                |

SQL Statement

| Statement              | Commentary                                                                                                                                                                                                                                                   |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Select                 | The select statement for data retrieval is the most popular statement. <u>Most select applies</u> to Bible..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries. |
| Insert, Update, Delete | The insert, update and delete statements are for data maintenance.                                                                                                                                                                                           |

Where Clause Operators

| Operator                                   | Commentary                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| =, <>, !=, <=, <, <=, !=, <,<br>>, >= != > | The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, rarely is this in use.</u> != < or/and !=>. <u>This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Overseeing for a date or number will search for particular types.</u> |
| BETWEEN                                    | This is a range check that accepts a beginning and ending value. It is not highly used.                                                                                                                                                                                                                                                                                                            |
| NULL                                       | No value                                                                                                                                                                                                                                                                                                                                                                                           |
| IN                                         | A comma-delimited list of valid options within parenthesis.                                                                                                                                                                                                                                                                                                                                        |
| LIKE                                       | Wildcard filtering                                                                                                                                                                                                                                                                                                                                                                                 |

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

| Title        | Commentary                                                                                                            |
|--------------|-----------------------------------------------------------------------------------------------------------------------|
| TOP          | Set a limit of the number of rows returned or a percentage of the rows from the source.                               |
| SET ROWCOUNT | The database will retrieve all the rows, but if there are excessive rows it will later <u>link to required rows</u> . |

Where Clause

| Title                                                  | Commentary                              |
|--------------------------------------------------------|-----------------------------------------|
| Like wildcard                                          | Preceding or following restriction "%%" |
| Check for NULL                                         | IS NULL versus (VS) IS NOT NULL         |
| Between range check                                    | Lower and upper limits                  |
| Logical comparison                                     | <, >, =, <=, >=, <>                     |
| Table join supersedes the previous column key equal to | FROM table join primary and foreign key |

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
  - Data type and size: String, number, date, logic boolean?
  - Not nullable? Can not be empty?
  - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
  - Check constraints, for schedule, dated from must precede dated until.
  - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
  - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

1. Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
2. Install a DBMS.
3. Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
4. Create database. Microsoft SQL Server supports multiple instances and databases.
5. The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
6. The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
7. The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
8. Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
  - URIChrist
  - URIEntertainment
  - URIGoogleNews
  - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose 2 datatype limits.

(Itzik Ben-Gan, 2023-07-03).

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalistic page\_load() and query\_submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js> which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js) does 2 types of date calculations. These are the:
  - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
  - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DateFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests. [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js)

```
fetchFender: async function
(
    fetchUrl,
    fetchRequest,
    callback,
    uidisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUrl,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uidisplay, rowColumn);
        })
    }
    catch (e) {
        uidisplay.innerHTML = e;
    }
};
}
```

(Robert C. Etheredge, 2017)

Programming

| The Author Programs in the Following Tiers and Languages |                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------------------------------------------|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Front-End<br>Browser                                     | HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS) | The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes. |
| Middle-Tier<br>Application                               | C#, Embedded-SQL                                                          | For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.                                                                                                                                                                                                                                                                                                                              |
| Server-Side<br>Backend                                   | Standard Query Language (SQL)                                             | The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.                                                                                                                                                                                                                                                                                                         |

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/GetAPage.html> calls the [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js) ajax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultTable div will contain the particular details that the program generates.

(Microsoft)

Data Science

The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers. What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.

1. The author extracts knowledge from data; by finding meaning to the word.
2. The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
3. The irreducible insights take, so far, is to computerize the work.
4. The vast majority of the word is structured data. Unstructured data does not fit into the background of the author.
5. The application domain is Bible studies; how relevant is the Bible to our work?

1. Empirical, find implication from the Bible?
2. Theoretical, to determine a better way to doing work?
3. Computational, is human labor replaceable?
4. Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

1. The Bible is our primary source of data.
2. The author records information sources. This is either a person or media?

1. **Data Acquisition:** The Bible is available on the Microsoft Access database.
2. **Data Storage:** The author imports this tabular data into the Microsoft SQL Server relational database.
3. **Data Retrieval:** The SQL select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
4. **Visualization / Human Insights:**
  - The raw data is viewable on the Microsoft SQL Server Management Studio.
  - The web service, `asmx`, file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
  - The `.html` presents the result in a human readable format.

1. Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words
2. Qualitative Data: These are rarely measurable and are personal interpretation.

At the beginning of the study, the author made a presumption that words are unique. Later the author found out that there are duplicate Bible verses

(Microsoft

## Structured and Unstructured

Structured data is alphanumeric put in row-column. Unstructured data is either text, image, audio, or video. This research is mainly structured data.

The author imports complete, not NULL nor empty data, such as the Bible and the dictionaries.  
The author achieves data validity by constraining and restricting inputs. Since this is not a commercial work, Key Performance Indicators (KPIs) are not vital.  
The author references and is not tampering with authoritative Bible work; this helps to make sure correctness - accuracy, consistency, integrity.  
Timeliness is effectual in the single user data entry table, HisWord.

## class

The information which the author documents in this section of the paper; is the Data Declaration Language (DDL) and Data Dictionary, which is available at [GitHub.com/SQLServerDataDefinitionLanguageDDL\\_Repository](#). The Data Manipulation Language (DML) is too large to fit into the GitHub.com repository, and it is intellectual property. For the people that have access to the database, this private information is available by generating the database script.

Contact is a primary entity, and it identifies the people and organizations that the author has a relationship with. These affiliations are family, friends, business, or public service links. Also recordable are their street, e-mail, web addresses, and telephone numbers. The author stores the various information exchanges with these people. A known date of birth, is for notification of the subject's birthday and relative age. To keep up with the privacy and sensitivity of this personal information, the author is not sharing this highly confidential data.

A URI is a link between a contact and its related information: one-to-many; that is a contact may have multiple addresses. The other 2 types of relationships are one-to-one, and many-to-many.

A URI is a link to a web resource that will add to the audience's knowledge. The author notes the address and the date, when the author became aware of this information. The content at an address is either textual, audio, video, or image? For URIs, the author rarely explicitly specifies the entire http protocol and directory post-fix, /. An incomplete address will not validate as an input uri type. The author only records the Wikipedia address<sup>1</sup> at the place of reference since it is easy to associate the title with the Wikipedia address.

Exists or does not exist? The `transact-sql` exists clause is useful for checking the existence of an object and if so, drop the object. This is applicable prior to re-creating the object. Please note that the metadata information is lost and the create or alter statement supersedes this approach. The `exists` clause is also useful in queries for determining the existence of a resultset.

These classes are important asset for the anniversary triggers; in the Remember entries.

The author chose a multi-tier architecture for building the application. The database layer is made-up of tables, views, stored procedures, functions. The database tables are easily stored and movable to other storage media. The SQL Server's data definition language (DDL), now supports DataTime2, and its date range extend between January 1, CE through December 31, 9999 CE. Some dates in [Wikipedia](#) mention these dates. The HiWord\_v9 contains computed columns, which depend on entries in the iWord table. The author extracts database information by building query statements.

The application layer is the bridge between the user interface layer and the database layer. The application layer compiles into a single [Dynamic-link library](#) (DLL), called Information\InfoTransit.dll. The application layer consists of four namespaces, namely, Information\Transit.DataAccess, Information\Transit.ProcessCode, Information\Transit.ProcessLogic, Information\Transit.UserInterface. What the author builds on the server; is accessible to all the clients. What is the lifetime of this code, and what neutrality does it condone? The author started out with [JBASE11](#). The lines of code for the application layer are in the C# and embedded SQL.

- HTML5 (.html)
- JavaScript (.js)
- Cascading Style Sheets (.css)

The .HTML files will work in all browsers; that support AJAX. Most of the interactive web pages are reliant on JavaScript to work, mainly because they use Ajax to interact with the server. Each .HTML file, performs specific task, and may have a corresponding `ajax.js` file associated with it. The unobtrusive JavaScript file [file 332.js](#) contains reusable code that is not .HTML files specific. The .HTML files originally contained the CSS specifications; however, the author now places styling information in a single external [file 332.css](#). This will reduce the sizes of the .HTML files, and it helps to achieve a consistent user interface.

The work of the author is interactive, and there are links to questions and answers pages. Most of the input entries are textual, but some are numeric, datetime, select options. The answers are mostly in tabular format.

(Vaibhav Verdhan)

A HTML document contains:

- Text content: The author informs the reader by describing his word.
- References to other files: The author refers to external files, such as UML images.
- Markup:
  - Elements: The anchor tag is the most specific.
  - Attributes and Values: The author benefits from the introduction of the customizable data- prefix attribute

(Elizabeth Castro).

- **Base Rules:** A base rule is an element and not a class nor ID selector. The author does not use CSS Resets. The author issues element selectors for the html, body, table and row.
- **Layout Rules:** There are no layout rules, such as header nor footer.
- **Module Rules:** The table of content (TOC) is for page navigation that the author offers using class names.
- **State Rules:** A state rule is for toggling, such as using Javascript to set the visibility.

(Jonathan Snook).

here is standardization on the first .NET web services architecture, .ASMX

(Frederiksholm, 2019) In most cases, there is a one-to-one mapping between the *HTML*, *ASMX*, *CS* files, and the database relational table, *Bible\_Scripture*. For simplicity and ease of use, the *HTML* and *ASMX* files support one operation. *GetPage.html* is the *workspace* for word introductions. *GetAPage.html* will send AJAX requests to multiple *ASMX* files and operations. *GetAPage.html* is a cumulation of separate *HTML* files. All the web services files support the SOAP request format and return *JSON*. JQuery accepts the POST, HTTP verb. The author stringified the data he passes to the web service in the body of the message. Errors are unforeseen, in the rare case, the author logs errors on the back-end, and display quantitative message. Security is lacking; this is permissible; since the author only queries the information.

The web service code, .asmx, file is not necessary, does not have a place, when there is no server database access ([Numbers 19:2](#), [2 Chronicles 15:3](#), [John 15:25](#), [Romans 2:12](#), [Romans 3:21](#), [Romans 3:28](#), [Romans 7:8](#), [Romans 7:9](#), [1 Corinthians 9:21](#), [Hebrews 9:22](#)).

The Web Service Description Language (WSDL) is available, for example, by specifying the URI, `AlphabetSequenceWebService.asmx?WSDL`. To generate a proxy code, issue the following command: `wsdl.exe /language:C# /namespace:InformationInTransit.ProcessLogic /out:"AlphabetSequenceWebServiceProxy.cs" http://localhost/WordEngineering/WordUnion/AlphabetSequenceWebService.asmx?WSDL`. The Web Services Discovery Utility (disco) command: `disco.exe "http://e-comfort.eprhaintech.com/WordEngineering/WordUnion/AlphabetSequenceWebService.disco"` will generate the companion files: `AlphabetSequenceWebService.disco`, `AlphabetSequenceWebService.wsdl`, and results, `discomap`.

A lecture of our beginning. (Hafida Na'im, 2016) The business rule is storable and processable in C#, (.cs), source files. The dynamic link library, (.dll), is callable from everywhere. GetPage.html computes AlphabetSequence from a simple logic, which is easily representable everywhere. The AlphabetSequenceIndexScriptureReference is retrievable from the Bible, using non-complex SQL query. The BibleWord and HisWord reference, requires substantive query. The Bible dictionary returns dataset from the local database. The author can not make a business decision, to go to a web service, to retrieve what is locally resideable.

The `usp_DatabaseLogSize` stored procedure is for determining the size of the databases data files; and it is available at [T-SQL to find Data Log Size and Other Useful information - SQL 2000/2005/2008/R2](#)

| Database Size   |            |         |           |        |               |
|-----------------|------------|---------|-----------|--------|---------------|
| Name            | Data Files | Data MB | Log Files | Log MB | Total Size MB |
| Bible           | 5          | 304     | 1         | 82     | 386           |
| BibleDictionary | 5          | 38      | 1         | 17     | 55            |
| WordEngineering | 5          | 138     | 1         | 1816   | 1954          |

## Database Design

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Prospect and Fulfillment](#)
- [Autobiography](#)

1. The relational model is for storing information in tables.
2. The author normalizes data using Object-relational mapping.
3. All the databases are OLTP (Online Transactional Processing), not OLAP (Online analytical processing).
4. Avoid deadlock occurrences by not permitting user database updates.
5. All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
6. Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

#### Database Security

1. The secretive web.config file contains the database access information.
2. The web.config file does not explicitly mention the user login name nor password.
3. Give access rights to roles, not to specific login identities nor user names.

#### Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

#### Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

#### Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

#### Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asa Brown Boveri)

#### Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

#### Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

#### High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.aspx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use [CSS sprites](#) since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Detach](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common uri scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.echaimtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4195610/designing-rest-api-endpoints-with-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML outweighs the newness of the JSON transport medium.
- HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
  - Migration to computed columns
  - Normalization
  - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

- The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.
- The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column.
- An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.
- The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.
- When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

- The alphabets and words make-up the author's work. The composition of the words is indefinite.
- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

- The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.
- This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (IsAlphabetic(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - ascIIA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

- One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.
- The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

| Module                                          | Unit                                                                |
|-------------------------------------------------|---------------------------------------------------------------------|
| <a href="#">GetAPage.html</a>                   | retrieveAlphabetSequence()                                          |
| <a href="#">AlphabetSequenceWebService.asmx</a> | Query(word)                                                         |
| <a href="#">AlphabetSequence.cs</a>             | ID(word)                                                            |
| <a href="#">ScriptureReference.cs</a>           | ScriptureReference(int alphabetSequenceIndex).                      |
| <a href="#">DataCommand.cs</a>                  | DatabaseCommand()                                                   |
| <a href="#">WordEngineerionSchema.sql</a>       | WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID) |

(Joost Visser)

[GetAPage.html](#) Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query\\_string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

- [Title](#)
- [Abstract](#)

- [Prospecty and Fulfillment](#)
- [Autobiography](#)

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

#### Random variable

The AlphabetSequenceIndex may range between 1 and  $(8000 * 26)$ , 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

#### Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

### Statistics Terms

#### Key Terms for Data Types

##### Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

##### Discrete

The identify columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

##### Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

##### Binary

The Testament column is either Old or New.

##### Ordinal

The identify columns are all ordinal, following an ascending order.

#### Key Terms for Rectangular Data

##### Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

##### Feature

The most important predictor columns are the Word, Dated, and ContactID.

##### Outcome

The documents include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

##### Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

### Software Engineering

#### Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.

The dreams are re-collect-able, and recallable ([Numbers 12:6-8](#)).

I have made what I have spoken, ready

#### Web Design Fundamental

##### Business Model

The Bible fits man's perception. The author adapts to what he learns.

##### Project Management

The author is journeying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

##### Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

##### Page Design

What He brings to us, is a form of Him.

##### Content Authoring

How query means more ([Isaiah 43:22](#))?

##### Linking Strategy

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search. Supplementary information for a href attribute is meta-data and [eHivis.com](#).

(Jakob Nielsen, 2000)

### Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

#### Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

### Characteristic

#### Resilient

[GoldAPage](#) The Bible is separable into parts; these are books, chapters, verses. Dividing a life, according to purpose ([Matthew 1:12](#)). 14 Biblical Generations =  $14 * 40 * 360 = 201600$ .

[DateDifference.aspx](#) The .NET Framework, C# and SQL Server support the Common Era; the date ranges between 0001-01-01 and 9999-12-31. The date difference will display correctly for the time interval - days, Biblical Calendar, and all the dates after the introduction of the Gregorian Calendar.

#### Declarative

SQL, Linq, CSS are declarative languages, but JavaScript is a functional language.

#### Contextual

Enhancements to JavaScript, such as const and let influence hoisting. So does script literal, strict mode, class.

The C# class container model and the optional namespace alias content the author.

Cascading Style Sheets (CSS) is modular, and its rules trickle down.

#### Continuous

Placing the [App\\_Offline.htm](#) file in the virtual directory of the web application will shut-down the application, unload the application domain from the server, and stop processing any new incoming requests for the application.

A single batch file, with a single command line, builds the only `.dll`, InformationInTransit.dll

```
csc /out:InformationInTransit.dll /target:library /recurse:"*.*" /reference:System.DirectoryServices.AccountManagement.dll,"bin\Debug\WtaIgitilityPack.dll","bin\Debug\lTextsharp.dll","bin\Debug\MongoDB.Bson.dll","bin\Debug\MongoDB.Driver.dll","bin\Debug\MongoDB.Driver.Core.dll","bin\Debug\Newtonsoft.Json.dll","C:\WINDOWS\Microsoft.NET\Framework\v4.0.30319\WPF\PresentationFramework.dll","bin\Debug\System.Speech.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.ConnectionInfo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Smo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.Adapters.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.SqlClnWrapper.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Management.Sdw.Sfc.dll","Microsoft.VisualBasic.dll /nowarn:162,168,219,618,649 /unsafe
```

After testing, InformationInTransit.dll is deployable to the WordEngineering's virtual directory, bin sub-directory. This transfer is via the copy command or the Microsoft Windows Explorer user interface (UI).

When the content of a server-side file with an `.aspx` or `.asmx` extension changes, the ASP.NET framework automatically re-compiles for serving future requests.

[jQuery](#) by John Resig is for making Ajax calls to the server. The more recent fetch command is also useful in later cases. jQuery helps to load the latest copy of the author's JavaScript repository [9432.js](#); since browser caching occurs for JavaScript files for a length of time.

The single `.css` file [9432.css](#) is callable at the bottom of each `.html` file's head node; JavaScript statements are in the last lines of the `.html` files. This means that the browser knows how to show the HTML elements before reaching their origination, and the browser's JavaScript engine will not reference a HTML node before the declaration of its definition.

[Set a Database to Single-user Mode](#)

If the research of the author is a team effort; the additional expense, time and effort, in staged deployments, is justifiable; such as development, test, production phases.

To reduce database load, the author considers the selection operation - where clause, distinct and top; projection operation - specify the column list, and not use the universal \*, for all columns. Rarely does the author join tables, minimizing the work and resultset. In a set-level language.

HTML5

## Semantic Elements

The author makes heavy use of the table semantic element for rendering tabular information. The author uses the input element and specifies either the text, number or date type attribute. The author tries the canvas and video elements for proof-of-concept.

### Non-Semantic Elements

The div and span elements are for rendering block and in-line information. The author uses the div as a container for the ubiquitous result set; which may contain a single or multiple tables. The span is a space for a non-block display.

Communication of God

- Audio: God first communicated with me by His Word.
- mit-out sound (MOS): This means of communication may occur when God intends interpretation or translation by a third-party.
- Video: This is the most resourceful use.

### Biblically

What did the Jews use numbers for, as mentioned in the Bible?

- Time: Creation...end time, period of life, marriage, worship, occupation, anniversary, prophecy and fulfillment, schedule
- Babel: One language and of one speech ([Genesis 11:1](#), [Genesis 11:9](#))
- Witness: Two or three ([Deuteronomy 17:6](#), [Deuteronomy 19:15](#), [Matthew 18:16](#), [2 Corinthians 13:1](#), [1 Timothy 5:19](#), [Hebrews 10:28](#), [Revelation 11:3](#))
- No man could number ([Revelation 7:9](#), [Matthew 10:30](#), [Luke 12:7](#))

### How are names issued Biblically?

- God initial naming such as, Adam, Ishmael, Isaac, John the Baptist, Jesus ([Genesis 5:2](#), [Genesis 16:11](#), [Genesis 17:19](#), [Luke 1:13](#), [Isaiah 7:14](#), [Matthew 1:23](#))
- God name changes such as, Abram to Abraham, Sarai to Sarah, Jacob to Israel ([Genesis 17:5](#), [Genesis 17:15](#), [Genesis 32:28](#), [Genesis 35:10](#))
- Family naming, such as, Eve, Cain, Seth ([Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25](#))

The word is the author's file naming convention

| Word                             | Scripture Reference                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

2023-08-26T20:00:00  
For the 2nd day consecutively I am wearing a green Fruit of the Loom t-shirt. Best trademark. 50% cotton. 50% polyester. Exclusive of decoration. Made in Honduras. XL/EG/TG. Black Adidas track trouser with 3 white stripes on each side.

At the intersection of Mallard Common 4750 and Woodduck Common 4740, South Center. The garage door of Mahdud's opened. Probably Hindi male in dark blue shirt drives southward. You have said, everything you need to say. On Decoy Terrace between Mallard Common and Seward Drive, South Center. I thought of Vivian Siu and her demand for me to wear better clothing. At the intersection of Decoy Terrace and Seward Drive, South East. God asked Why? Do you like Me? To create one for who?

How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?

| Procedure, function or method call |                                                               | Commentary                                                                                                                                                                        |

| Wake-up orientation database table | This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.                                                                                                                                                                                                                                        |
| Non-Alphabetic                     | AlphabetSequence may not be appropriate for people that use glyphs or sign languages.                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Structured query language (SQL)    | <p>The proposed changes which will offer query customization?</p> <ul style="list-style-type: none"> <li>The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion.</li> <li>With search-engine queries, the author proposes a query-language. This potentially affords better resource granularity restriction, arrangement option, and maturity of use compensation.</li> </ul> |

This research largely deals with structured data that is put into relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and data tables. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

| The Terminology of Machine Learning in Relation to AlphabetSequence |                                                               |
|---------------------------------------------------------------------|---------------------------------------------------------------|
| Term                                                                | Meaning                                                       |
| Training dataset or training set                                    | The recording of the word in the database.                    |
| Example (or data point, data instance, sample)                      | Each database row or record.                                  |
| Predict Label (or target)                                           | The corresponding Bible text.                                 |
| Linearity assumption                                                | The features alphabet places.                                 |
| Weight                                                              | Since the word is the only feature, it is the only influence. |
| Bias                                                                | A starting value.                                             |

(Dive into Deep Learning)

## Object Oriented Programming - GetAPage.html

A type of us: is a kind of us? GetAPage.html is Bible specific.

### Parent Scripts and Objects

GetPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.

HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript are on HTML tags. JavaScript and CSS render the contents of HTML.

There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

## Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is

| Timing                                                           | The greater light, the sun, and the lesser light, the moon, are signs.           | GetDate() returns the date and time.                      |
| Ordering                                                         | Greatest commandment, greatest among us, honor thy father and thy mother         | ORDER BY ASC, ORDER BY DESC. Lag or lead.                 |
| Sampling                                                         | Wandering years                                                                  | ORDER BY newid()                                          |

2025-07-31T13:25:00 What does the link provide?

1. 2025-07-31T15:12:00 The anchor tag provides a hyperlink to a source that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.
2. 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.
3. 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) availability? Static versus (VS) dynamic?
4. 2025-07-31T16:05:00 The frame tag embeds one HTML document within another.
5. 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?
6. 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?
7. 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.

2026-09-04T07:40:00 Believe an instruction book

1. Scene 1: I am at a location like Barnes & Noble, Jack London Square. A male worker frastly or fremont bleaved his country of origin is Morocco.  
 2. Scene 2: I crossed Decoto Road eastward between the intersection of Decoto Road and Fremont Boulevard and the American Buddhist Cultural Society - Fremont, California ~ 3850 Decoto Road, Fremont, CA 94555, Telephone: (510)818-0077, Fax: (510)818-0665. I anticipated I should ask Raymond Obama to act as an editor by giving him a printed hardcopy of my Mobile Intellectual Memory (MIM) doctorate dissertation thesis to edit, and I should 2026-09-04T09:25:00 continue my writing by appending an additional how-to-use manual.
1. The Pentateuch, the first five books of Moses as a whole, is referred to as the law (Luke 16:16, Matthew 11:13). But specifically, the 3rd of 5 books, and the center book, Leviticus, is called the Aaronic priesthood.  
 2. The author and himself, the data modeler, in most cases make the foreign key column. Contacted 2026-09-04T10:19:00 optional and nullable, except when it serves as a composite primary key, in the contact address tables. 2026-09-04T10:23:00 Since names are duplicable... ContactId ensures entity uniqueness... uniqueness... 2026-09-04T10:31:00 and spelling consistent.

2026-06-01T03:14:00 Vocation

- 2026-06-01T03:14:00 I searched at home, I watched my twin sibling walk towards the north, after transport had departed, and I realized my vacation location to follow in the footsteps of my twin sibling to officiate game time.
- 2026-06-01T08:44:00 Separated into halves... separated into two universes. (Hebrews 11:7-23 Matthew 14:17 Revelation 11:2)
- On 1993-09-24 I watched the Sydney 2000 Summer Olympic Games, Australia's David Goffin was selected as female tennis player selection.
- Know the end-time. 2026-06-01T04:22:00 In a game.... There may be interruptions. 2026-06-01T04:23:00 There are separation of intervals.
- 2026-01-20T01:07:00 A male was given an answer Of something what I perceived to be members of the opposite gender games. I went inside a room, and as I viewed from the south-west, I saw a male standing in the center-east and on top of him, his property was labeled with his first name initial and his last name (Revelation 14:11, Revelation 14:14).
- 2026-01-20T01:36:00 My twin sibling and I were attending a social gathering. My twin sibling warned me, and he briefed me that I have industry experience that it is user-experience that the interviewers will focus on. A form contained a question for the responder to specify a particular directory folder path. The British Prime Minister, Margaret Thatcher, will give a speech at a podium, and introduce her Olympic medal-winning husband, who walked from the north-center westward.
- 2026-06-15T19:31:00 My twin sibling is learning Postgresql database on the job, like I fully tried to learn JavaScript at Baynet World Inc. (BayNet.com) and Daigaku Honyaki Center (DHC).
- 2007-10-25.. 2026-06-16:00:09 days (10 biblical years, 10 biblical months, 29 days) (1 year, 8 months, 3 weeks, 1 day)
- 2026-06-16:00:30 What did he intend to use... how do I use it?
- 4 2026-07-15:00:34:00 What did Center use? How are you after him? (James 12:5-12.1 Daniel 9:2-7)
- I saw a hard pipe at the west of the house of Winnie, and later to the east of the house of the Hough family.
- Winnie lives at 4761 Canavassack Common, Fremont, California (CA) 94555. United States of America (USA).
- The Hough family lives at 4685 Mallard Common, Fremont, California (CA) 94555. United States of America (USA).
- 0032-04-06.. 2026-07-15:00:34:00 (4761 / 4685) = 0032-04-06.. 2026-07-15:00:34:00 1.0.62Z198505899797251867667535 = Date Difference: 78293 days Interval: 105744.14005183718 Thursday October 13 0321 0321-10-13.
- 2026-06-01T04:00:00 Let's make a series, let's go.
- In the south-west vehicle parking lot of the Chan family, 4701 Mallard Common, 2026-07-15T14:51:00, I contemplated the career starting point of Ademioluwa. I projected Ademioluwa should begin his industry experience in Quality Assurance (QA), which was mind-numbing for Kevin the Irish Macquarie Bank, Wyndham Station, Sydney, Australia. Since the year 2000, my work experience has focused on WebEngineering and specialist AlphabetSequence. On Friday, the date, 1995-05-07, my twin sibling and I traveled to Los Angeles to visit our parents. In the master bedroom, I saw the Holy Spirit in the Yoruba language, I lay eyes on him, which translated to English means, "It is my person's house, you are going to the word came in the house of the Mahdi, 4705 Mallard Common, and the house of the Chan family, 4701 Mallard Common, as I turned back, returned from the intersection of Mallard Common and Woodstock Common, east.
- 2026-07-21T22:59:00 I boarded the AC Transit line 281 bus at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and I walked southwest. Kimberly Lee was walking in front of me towards the store. Audrey Russell (Mik & Honey Cafe, Pegasus Center, is traveling to Amsterdam, Netherlands, next week.
- Vision: While walking on Paseo Padre Parkway between Blackstone Way and Siward Drive, on the overhead bridge, the word, salvation, was spoken. I saw on the bridge an orange pencil, Office Depot #2/B.
- What did she determine... to use him for? (1 Kings 2:1)
- 1999-05-07T00:00:00 ~ 13 biblical years or 4680 days = 1986-07-14T00:00:00
- 2026-07-15T14:51:00 What he has chosen... as reference?
- 2026-07-15T15:25:00 To observe the performance as relative.
- 2026-07-15T16:04:00 When did he retain a person... as a life?
- I was walking on Siward Drive, between 4809 Mallard Common and 4806 Mallard Common.
- 2013-11-28 Remove me from uncleanness.
- 2013-11-28.. 2026-07-15T16:04:00=4612 days (12 biblical years, 9 biblical months, 22 days) (12 years, 7 months, 2 weeks, 3 days)
- 1941-07-17.. 2026-07-15T16:04:00=13044 days (86 biblical years, 2 biblical months, 24 days) (84 years, 1 month, 4 weeks)
- 1941-07-17.. 2013-11-28.. 2026-07-15T16:04:00=85.14366703214% (John 3:36 John 5: Deed days 11, 10 days)
- 2026-07-15T19:44:00 What do I have... person/fun my besto (Daniel 2:38 Genesis 1:1-3)?
- 2026-07-15T19:44:00 What do you comprehend where we are... and how we will be. (Romans 8:11 Revelation 20:6)
- My purpose, and mission, is to help the world understand the true meaning of mind control for its works. I was to the west of Winnie's house, 2nd or 3rd fence from the house, and I was walking southwest. At Albertsons Lucky, Charter Square, I saw Jennifer Meloy, Blanca Ramos, Alexis the Portuguese, Mark Valentine the English retired American Airlines mechanic, Dennis Kolmeyer, and Mary Kolmeyer in a wheelchair. In the car parking lot, Maria Sandoval Hernandez the Hispanic clerk does not work on Sundays, and those asked me to arbitrate between her Naanda, and who gets to walk around, was eating, and she gave me a fat bone.
- 2026-06-09T21:07:00 Doctrine of Election 2025-06-09T21:07:00.. 2026-07-15T16:04:00 = 13 biblical years, 11 biblical months, 18 days) (1 year, 1 month, 1 week, 6 days)
- 2026-06-09T21:07:00 Doctrine of Election 2025-06-09T21:07:00.. 2026-07-15T16:04:00 = 13 biblical years, 11 biblical months, 18 days) (1 year, 1 month, 1 week, 6 days)
- Sun Jun 14 2026 00:00:00 GMT-0700 (Pacific Daylight Time) 2026-06-14T00:00:00
- 2026-07-21T18:50:00 What did He make him (Hebrews 8:6 Genesis 4:1-5 Genesis 4:1-13 Genesis 50:20 Daniel 2:36-45)?
- 2026-07-21T19:01:00 Who relate (Isaiah 19:26 John 15:27)
- 6 2026-07-18T22:27:00 Eternity continued (Isaiah 41:8)
- Omo Yonah. Succeed versus VS9 successive?
- 2026-07-18T22:27:00 Success (Isaiah 41:8) (2020 United States presidential election)
- The residing child prefers the other children to learn his language. Scene 1: In the center-west, I am lost and afraid. This is probably in the vicinity of the house of Alghat Layou Kayode Jakande (JLKO), act governor. I heard some children speaking, learning, and specializing in a regional language. 16:12 The residing child prefers the other children to learn his language.... which is indigenous to their territory. Scene 2: Mathew Omuriy is the host of an acquaintance, family and friends party. Mathew Omuriy is standing in the center, to the north-east of a rectangular table, which stretches across. I asked Mathew Omuriy about the absence of our mutual friend, Gordon Joy. Mathew Omuriy said Gordon Joy depends on his Jamaican wife for travel, and Mathew Omuriy is the friend of the Jamaican woman. Gordon Joy is the son of the Jamaican woman. The indication is generational territorial grabbing will decide the 2024 presidential election. The temporal non-attendance of a descendant, Gordon Joy, is well-served. The Republican is more pro-American and astute, while the Catholic party is more alive-giving.
- 2026-07-15T16:23:00.. 2026-07-18T22:27:00=420 days (1 biblical year, 8 biblical months, 20 days) (1 year, 8 months, 1 week, 5 days)
- 2026-07-18T22:27:00.. 2026-07-18T22:27:00 [Isaiah 41:8 Chapter Sequence=720 Versus Sequence=1840 Chapter Sequence=PerCent=59.3530962=2025-11-08] (Isaiah 41:8 Psalm 67 Psalms 6: Nehemiah 12:1-2)
- 7 2026-08-11T07:49:00 Abdul-Azeez Ali is temporarily putting tape in the center of the house, south-west frame base of a window.
- 2026-08-15T05:20:00 My twin sibling shared a website for American banks ratings. I wanted to check the rating for a particular company. There were customers standing who welcomed me in center-east. 4-letter initials, 2 on each side.
- 9 2026-07-21T00:31:00 Who Wins (Genesis 25:23)
- Thank you, Wake.
- I followed the documentation of my twin sibling for Microsoft SQL Server. Pastor Adekunle Arifayo asked about the work duration.
- 2026-08-23T07:13:00 Anthony Novak complained that an entire video was cut off. It was working on a personal computer (PC) application.
- 2026-08-23T07:13:00 Who waits to be led (Ezekiel 18:13-20)
- 12 2026-09-09 21:20:23.660 Alghat Layou Kayode what he wants... to become of you (2 Samuel 3:12)?
- Scene 1: As I walked away from home, I saw the owner Mik & Honey Cafe, moving the north-east chair to the west of the customer service desk, around. As she exited outside to the west, I asked Councilor Teresa King if her ex-marriage husband was Asian, and she said yes. I walked back to the office, and I saw Roger Dumas, the Chief Executive Officer (CEO) of PowerSoft, Australia, and I reached my work station. I wrote a letter to Roger Dumas, the CEO of PowerSoft, Australia, and I reached my work station. I could not work as a consultant since I did understand how software engineer the PowerSoft Client/Server application. I designed and implemented Alphabet Sequence, which I wrote Bible stories for software engineering learning, but I had limited scripture knowledge.

2025-02-10T05:41:00 Until the land has its rest. I saw a house in the center-west.  
2025-02-10T06:22:00 In Isaac shall your seed be called. I am on a narrow road in the north-center. This is either Bing's Dumpling or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing tight-fitting white trousers. At the intersection of Fremont Boulevard and Paseo Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue, but the red color looked like orange. There were young Asian females running from the center-west, upper, and turning towards the south-west. There were cars moving and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

(Itzik Ben-Gan, 2023-07-03).  
Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

2026-08-11T16:00:00 What... together... meant for you and me?

- 2026-08-10 Creating Your Own Library Posted on July 25, 2026
1. In 2002, while I was taking computer courses at Ohio College 2026-08-11T22:29:00 to renew my skills... I started copying sample C# programming language source files.
    - On about 2005-10-06, I started to model relational databases to record the words spoken by the Holy Spirit to me, contact address book, and bookmarks.
    - I also stored to reference 2026-08-11T22:38:00 religious work... Bible, dictionaries, and commentaries. 2026-08-11T22:56:00 These were initial Microsoft Access... .mxd file stands for Master Database File, that I exported and imported into Microsoft SQL Server relational database tables.
  3.
    - 2026-08-11T23:02:00 My expectation... was to build work samples and demonstration deliverables for 2026-08-11T23:04:00 eventual employment.
    - 2026-08-11T23:05:00 I understood my limitations in the past... was not having a supportive framework, 2026-08-11T23:07:00 and recent work experience, and in-demand market skills.
    - 2026-08-12T00:03:00 How the ease of using... helps me.
  4.
    - 2026-08-11T23:16:00 A readiness to listen... learn.
    - 2026-08-11T23:20:00 What uses my skill?
    - 2026-08-11T23:33:00 What does the world require for me... that I need?

| Keyword  | Find what         | Replace with          | Scripture Reference             |
|----------|-------------------|-----------------------|---------------------------------|
| Religion | Idolatry          | Monotheism            | Acts 7:40-43                    |
| Learning | Egyptian          | Hebrew                | Acts 7:42                       |
| Location | Egypt             | Promised Land         | Acts 7:3-7                      |
| Vocation | Ruler and a judge | Ruler and a deliverer | Acts 7:10, Acts 7:22, Acts 7:35 |

What is remembrance... associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

| 2024-01-17T13:36:00 Alphanumeric |                |                          |                                                                                                                             |

- Autobiography

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

AlphabetSequence concerns include:

1. How essential are we to the personification of God?
2. The spirit man holds
3. When did he exchange...his view as ours? ( Genesis 18-19 )
4. How are we acceptable to what is new? How does God, build up, to His word ( 1 Samuel 9:15-17 )
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Sound: what is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses ( Matthew 23:14, Acts 8:37, Acts 15:34, 1 John 1:15 )
14. Naming of words ( Genesis 32:28, Genesis 35:10, Genesis 47:27 )
15. We have been doing unconvincing work
16. I said, I heard. 2021-04-11T08:37:00 In a location to the North, probably 99 Ranch Market or Marina Food, or Daio. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6.9 is too short. I said, 6.9, in my sleep, while dreaming. I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does He volunteer as time? AlphabetSequence is resource minimal:
  1. Double by hand
  2. Compute: Not technologically demanding
  3. Maturity: Since 2002
18. Generation into Sequence.
19. Is this a finalized work, and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word – and not ~~stated~~ – by the grammatical correctness.
23. To co-operate as we are. Robert Estienne English Alphabet

## 2017-03-06T00:00:00 A Comparance of Age

Divided as separated. Go this way, that way.  
I want to program, but I don't want to match two programs together, except for deep thought.  
See when God grants increase; such as in creation, when He counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs – the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt ([Genesis 37:5-11](#), [Genesis 30:23](#), [Genesis 40-41](#) ).  
TC2Q2 is separable into four layers; these are the link, Internet, transport and application layers. No breaking ([Matthew 19:8](#) ).

## Marriage

Marriage is not a practice, in the life after, resurrection ([Matthew 22:30](#), [Mark 12:25](#), [Luke 20:35](#), [Revelation 21:2](#), [2 Corinthians 11:2](#)). Coincidentally, the disciple, who Jesus loved, who the apostle, does not mention this, in the Gospel of John. [It is more of a father that wants you, Jesus resurrected, after three days \(\[Matthew 14:20\]\(#\), \[Mark 16:7\]\(#\), \[Matthew 21:26\]\(#\), \[Mark 8:31\]\(#\), \[Mark 15:20\]\(#\), \[Luke 2:46\]\(#\), \[John 2:19\]\(#\), \[John 2:20\]\(#\), \[2 Corinthians 11:2\]\(#\), \[Revelation 21:2\]\(#\), \[Revelation 21:9\]\(#\), \[Revelation 21:17\]\(#\)\)](#). The breaking of bread ([Palms 34](#), [John 19:36](#)).

On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.

The application is in a dynamic link library (DLL), and it is reusable into client, database, and application logic, but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.

The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics claim that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenger.

Visibility ( John 4 )

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript. The database contains the real information, that makes-up the result set.

Lifecycle ( John 3:3, John 3:7 )

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture

Accompany ( Matthew 4:6, Matthew 18:10 )

What are the pairing?

The client started as HTML, but now has JavaScript and CSS.

CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas

JSON and XML have made in-roads.

To each resemblance

1. Where His word expected mine? When I get a word from God I could do the following:
  1. Write the word in my notebook, and never refer to it again.
  2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns
  3. Produce an artifact based on the word.

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchical?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is capacity full enough?
  1. Databases may reside inside multiple files.
  2. Although databases may store different file types. This wasn't the original intention.
  3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

What did He find... as useful

What did He find...as useful ( Matthew 21:42, Mark 12:10, Luke 20:17 )

| Technology                                    | Usefulness                                                                                                                                                                                                                                                                                              |

| Logical hard disk drives       | 4 including 1 solely for processing, and the other 3 drives mainly for archive.     |

### A Causal to Hearing Words

He said and He did. Word work ( Genesis 11:1-9 ). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include

- 2026-07-25T16:15:00 Learning and modeling the Bible and building a framework and a set of reusable components with class objects instantiated collections. This initial application, process logic, includes scripture reference, the 66 King James Version (KJV) Bible books and query-able Bible Word, and personal initiatives. For example, AlphabetSequence.
- During execution, I intend how to write the a thesis, do practical project building, select electives, and focus on specialization for specialty.
- 2026-07-25T19:17:00 What will have the most impact on your life?  
At Newark, California (CA) 94560, I owned and lived in my 1st American house.
- 2026-07-25T18:11:00 What was he savior he wants to be? (Genesis 1:1-26; Genesis 24:50 )?
- The intersection of Paseo Padre Parkway and Hall Way, north-east. I was walking southward. When I first received word, it was pertaining to my personal life and experience, vocation, and relationship.
- 2026-07-25T18:11:00 Was most occasion to use? Phoe Chan first changed his south-west, and secondly, Phoe Chan changed his north-west, and, his son, Aiden Chan, watched and aided.
- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at Ohlone College, in the Fremont and Newark campuses.
- Read books and magazines at Barnes & Noble Borders, Walden Pond Books Wal-Mart and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Solitary living at Newark City in California, Patmos.
- Fast, everyday, only ate, once a day, in the evening. I ate Hanuma Helding Kokuho rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revelation.
- I was living on a meager income ( Exodus 21:25 ).
- Only familiar with Case-based Reasoning and Use-Case.
- AlphabetSequence is abecedary.
- Set-based: Effort to record everything Bible code.
- This is a man, he wanted to know about his favorite ( Daniel 1:3-21, Daniel 9:23, Daniel 10:11, Daniel 10:19 )?
- Disobey John 5:19?
- Personalization of Realization ( Proverbs 25:2 )?
- I will make the difference ( Deuteronomy 26:5, Ezekiel 16:3 )?
- What was his spirit to be?
- 1987-12-31, I will not entertain Nada. Prosba's make New Year predictions.

| Actor        | People, promise     | Scripture Reference                                              |
|--------------|---------------------|------------------------------------------------------------------|
| Jesus Christ | Messianic Covenant  | <a href="#">Jeremiah 31:31-34</a> , <a href="#">Matthew 1:17</a> |
| Joseph       | Sun, moon, 11 stars | <a href="#">Genesis 50:20</a>                                    |
| Moses        | Passover            | <a href="#">Hebrews 11:23-29</a>                                 |

2026-07-04T08:11:00 **Who knew how to use the computer with plug-in** (Acts 1:4-5)  
2026-07-05T17:35:00 **What did he... occur... as the same... as**  
2026-07-05T20:18:00 **How we are... our type** (Galatians 3:28, Hebrews 11:1-3)  
2026-07-06T00:12:00 **The continuation... of all... things** (Genesis 1:1, Genesis 4:26, Daniel 2:34-35, Daniel 2:44-45, Revelation 20)  
2026-07-06T13:16:22 **What part... of design... are you?** (Judges 18:13-27)  
2026-07-06T15:08:00 **Displacement... disorderly** (1 Chronicles 10:14)  
2026-07-06T19:40:00 **Technology... where are you?** (Daniel 11:32)  
2026-07-06T19:58:00 **It's all... he... places**

- Kowe included the additional Yoruba alphabet with diacritical marks, a dot below, and high and low tones; and a dictionary and a translator.
- A relational database includes related tables with primary keys, foreign keys, constraints, defaults, clustered and non-clustered indexes, views. A client/server composed of 2 computers interacting together, with possibly an application-tier extension. During my Master's degree at the University of Technology, Sydney (UTS), I first wrote a paper on distributed databases, and finally a thesis on Client/Server.
- During my Doctorate degree at the University of Wollongong (UOW), I researched intelligent appliances which are composed of smart cards and flash memory.

2026-07-03T14:31:00 **Accepted of manage** (Luke 1:20, Luke 1:38)

2026-06-14T16:26:00 **What vary?**

- I started with word processing, and I advanced into Extensible Mark-up Language (XML) and Extensible Stylesheet Language Transformations (XSLT), and later relational database schema.
- In Righting Software, Juval Löwy of IDesign, prescribes grouping use-cases and their extensions.  
(Juval Löwy, 2019-11-27).

2026-05-29T10:26:00 **Database writing**

- 2026-05-29T02:31:00 There is a difference between writing an event, and associating personal testimony. There is only so much information an author can write on paper, 2026-05-29T03:17:00 and later use a computer to further his thinking. Complement, re-cap. 2026-05-29T03:19:00 As could be seen from study Bibles. 2026-05-29T03:21:00 Anthony Novak, my colleague at Information Dialing Services (IDS), a subsidiary of White International, once pointed out that I do a lot of clipboard copy and paste. Anthony Novak may be referring to Kowe, where I re-draw a Yoruba alphabet image, whenever a user presses their corresponding Function Key.
- 2026-05-31T11:45:00 He is not searching the Internet... he is searching... a local database. Replication from the central database, Informis to the remote database, Watcom SQL Anywhere. [Kowe on your data](#).
- 2026-05-30T16:04:00 **What is aside from the fact?**

2026-05-30T13:46:00 **How he will know the distribution?**

- Moses: What did he intend to use ([Hebrews 11:23-29](#))?

(Alberto Cairo, 2026).

2026-05-17T15:36:00 **What did he collect as a future?**

- 2026-05-16T07:26:00 Scripture references uttered to you.

**What is best believable** (Deuteronomy 13:3)?

**I am not asking You to take my word as Yours. I am asking You to change my word as ours** (Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13)?

- In the HisWord table, the order of belief is:
  - Scenery
  - Commentary
  - Word
  - System generated: DateTime and identity columns
  - Association columns: ScriptureReference, ContactID, URIThe author is an authority on the HisWord table.
- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

2026-05-14 Inconsistency —

2026-05-14T21:42:00 **The author has used different source from composing his work.**

2026-05-14T21:46:00 **How we are... in the midst... of each other.**

- AlphabetSequenceIndex language? The author does not make a distinction between the English and Yoruba alphabet sequence.
- Word of the author versus Bible versions — The correlation between the word of the author and the Bible differs and varies between the versions of the Bible.
- Dictionary — The author refers to dictionaries from multiple sources.

(Alberto Cairo, 2026).

2026-05-10T14:05:00 **What exact... has He notice... about you?**

- 2026-05-10T14:05:00 Re-locate:
  - Prior to 1988-10-15 First dream:
    - I Am taking you on a journey.
  - 1998-05-08 Last word, before re-locating from Australia to the United States of America (USA).
    - Face to face: Out of Egypt, have I called My Son ([Isaiah 11:1](#)).
  - 1999-05-07 First word, after re-locating to the United States of America (USA).
    - Face to face, in the wardrobe, closet, of the master bedroom. Ite eyan mi lon to yi. It is my person you are going to.

2026-05-07T17:49:00 **Word rank**

- [They were taught by the spirit... to talk as the spirit.](#)

2026-05-06T11:52:00 **HTML tags Unordered List Versus (VS) Ordered List**

The difference between the ordered list tag, ol, and the unordered list tag, ul, is not enormous... to deserve 2 separate tags. An optional... style of numbering attribute will suffice... which may have a default. The ordered list tag already has a type attribute.

2026-05-07T12:22:00 **How can he... be... like us?**

- [I have always drifted toward the academic.](#)

2026-05-02T21:30:00 **Could I re-write this... biblical?**

- Power of the Holy Spirit ([2 Peter 1:21](#))

2026-04-27T16:01:00 **WordEngineering query**

- WordEngineering query - database  
Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
  - Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
  - Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
  - Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
- WordEngineering query - client  
Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
  - Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
  - Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
  - 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 **To know at the start... what I Am?**

- When I started Kowe, I was a deported Yoruba man.
  - 2026-04-27T19:59:00 This I will find useful... for my people.
  - 2026-04-27T20:13:00 I could use the computer... for my weakness.
- When I started AlphabetSequence... 2026-04-27T20:22:00 **I must find... for what... He accumulated in the past** ([Genesis 15:5](#), [Revelation 16:12](#)).

| InfoType | CountInfo | PercentageOfTotal |
|----------|-----------|-------------------|
| Alpha    | 111590    | 93.740811989146   |
| Numeric  | 851       | 0.714879747313    |
| NULL     | 6600      | 5.544308263539    |
| Total    | 119041    | 100               |

- **data-ssn**: For example, Representation State Transfer (REST).

- English is our colonial language; Yoruba is my native language (*Acts 22:2*).
- 1. Accessible from a webpage, the author hard-coded translations from the Bible by using a New Testament phrase.
- 2. In the WordEngineering database, the *TimeComingAndOfTime* table, contains learned spoken language translations.
- 3. In the WordEngineering database, *HisWord* table, there is my EnglishTranslation column which is not null when the word column contains non-english words.
- 4. In the WordEngineering database, *HisWord* table, there is a location column, *physical*; and there is a scene column, *dream*.
- 5. In the WordEngineering database, *HisWord* table, there is a *PseudoCode* column, my profession.
- What?
- 1. 2025-03-0107:13:00 Microsoft Word and past-tense, Karl Boelens of Electronic Data Systems (EDS) and the verb, will future reference.
- 2. 2025-03-0107:11:00 Online transaction processing (OLTP)... Online analysis processing (OLAP).
- 3. 2025-03-0107:06:00 Computer equipment such as 2025-03-0107:06:00 the old computer on paper, the old computer on paper, the old computer on paper.
- 4. There is a date/time attribute which is only viewable inside the HTML source, *Metatdata*: 2025-03-0107:24:00 *Make the assumption... to automate marks*.

- Bible groups is the arrangement: Pentateuch, major and minor prophets, Gospel, Pauline Epistles, General Epistles...
- Doctrine of Imminency? Imminent
  - Apocalyptic
- Word schedule
  - Prophecy and fulfillment
    - Dream or vision... interpretation
      - Speaking in tongues or unknown language... translation
- Old and new
- Everything Has Its Time (**Ecclesiastes 3:1-8**)

Read the newspaper. Uncle Demola cautioned me not to talk or write any spirited material concerning the Italians or Europeans. Visited Poland, Warsaw, down a pit. That's where Ralph Silverman is from. There are joint talks on Rome phase II. |               |            |                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Marriage      | 2014-03-14 Ko ni ri iyawo, today. He won't see his wife, today. (English 24-18) |                                                                                                                                                                                                                                                                                                                                           | From          | Until      | From... until                                                                                   | Commentary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

We are inside a house and Buki closes the doors eastward. Outside on a beach, an acquaintance, Buki or Stacy Brothers drinks coffee, a recent habit of his. There are 4 sachet bags of coffee. Someone speedily drives a car to our north. I worried about children pedestrians. A male speaker said that Australia will attract a large population of migrants in the end, as a half residence. He quoted Daniel 12 fictitiously, saying the longest length between the top of a building and a mountain top exists in Australia. Australia conceded that when it makes economic reports, it is always before Italy, so it does not have to match Italy. He said Greece does not run, either: 7420 days / 7 = 1060 weeks. |

To:  
Subject: Your SQL Server background caught our RR -- 18-28 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:  
 SQL Server DBA & User Support Specialist – 100% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-time Contract (est. 18-28 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order: tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location — HisWord table, Word column. The surrounding related information is inferred and subjective (Matthew 16:23).

2025-12-25T21:46:00 Time to first frame

When did He define His rule.(Genesis 18:19)?

1. Time to first paint: HTML presentation
2. Time to interactive: JavaScript generation of Document Object Model (DOM)

2025-12-26T21:59:00 Timeline inspector

GetAPage.html Includes performance.now() for AJAX calls 2025-12-26T22:35:00 initiation and completion. 2025-12-26T22:28:00 We must...schedule one another...as ourselves.

2025-12-28T19:25:00 User Interface API Documentation

2025-12-28T19:30:00 Content

2025-12-28T19:32:00 Why would I ever use this API?

The web pages and their associated web services calls provide examples 2025-12-28T19:37:00 on how a client can access the database.

2025-12-29T21:15:00 How should I use this API?

- 0% ...100%: BiblePercentage.html

| Layman                                                                                                                   | Know their God                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases. | Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.                                                                         |
| I used to rely on my education and experience.                                                                           | Now I draw on expert opinion? 2025-12-04T22:00:00 Expert Facts, 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. What messages for the other? |

2025-12-05T06:50:00 Scene 1: I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch went drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes to Bondi Beach. Scene 3: I was trying to find the relationship between the availability of theorists and Theorems.  
2025-12-05T12:09:00 What did He turn to...as usage.(2 Chronicles 16:9)? San Jose Market Center. 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.  
2025-12-06T15:26:00 What does He associate...with me...and how do I be the guide?

2025-11-23T00:28:00 What have you...used...the Bible for.( John 20:31, Acts 17:11, John 5:39, Joshua 1:8, Daniel 9:2)?

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.
4. Learn language by using sacred text — reading, writing, hearing, speaking, translating.
5. Check religion 2025-11-23T01:52:00 for conversion (Acts 17:11).
6. Bible calendar for events and anniversaries.
7. Which authority for which event?

- Autobiography

8. Compare times? For example, during the time the Bible was written, Jews worshiped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost.

2025-10-11T03:24:00 Absent... of the same.

- A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 Can we determine... to be usage?
- Nullable
  - Outer join
  - Union
  - Default
  - Like

urlPerformance

1. [webpagefirst.org](#) In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10).

Microsoft SQL Server limitations include:

- [Microsoft SQL Server database connection string ApplicationIntent=ReadOnly](#)
- On the referencing side, it can only relate to a single referenced entry.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero [Zero five eight four one](#), versus (VS) [5841](#)

2025-07-30T10:22:00 Schema changes

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
2. The SQL Server Management Studio table design menu option provides the most flexibility.
3. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. [URIMaintenancePage.aspx.cs](#) For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 [Can I be impartial as others?](#)
  - 2007-08-04 [FaCop is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines](#), 2025-07-14T16:50:00 [To what extent do I know the culture of others?](#)
  - [JSLint: The JavaScript Code Quality and Coverage Tool](#)
  - 2018-01-05 [WAC Status Validation Service](#)
2. Information Hiding: 2025-07-17T20:46:00 Addressing. 2025-07-18T19:33:00
  1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
  2. 2025-07-18T19:45:00 While working on a project for Information Dialing Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload.
  3. 2025-07-18T19:51:00 OSSS telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/ server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 [Koww](#) is a writing tool... where is the speaker?
  4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.
  5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.
    1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service... .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.
    2. Application: A dynamic link library [InformationInTransit.dll](#) queries the database.
    3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 [and retrieve the compared God's word](#).

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

[Software Engineering: A Modern Approach by Marco Tulio Valente. Use-cases](#)

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

1. - The user enters the word to interpret
2. - The system determines by using regular expressions the data type of the word
3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 [he relies on his ousance of the truth](#)

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

| Interest of the users               |                                                                                                                                                                                                                                                                                                                                                         |                                                                                                    |      |   |                                                                                                    |   |                                                       |   |                                                            |

|                                     |                                                                                                                                                                                                                                                                                                                                                         |                                                                                                    |      |   |                                                                                                    |   |                                                       |   |                                                            |
| Proprietary                         | Open source, 2025-06-27T20:55:00 and availability of learning materials                                                                                                                                                                                                                                                                                 |                                                                                                    |      |   |                                                                                                    |   |                                                       |   |                                                            |

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming.. Computed Columns

1. 2025-05-17T20:16:00 Pure function, referentially transparent:
  - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 [are the same languages](#).
  - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). [Singularity of the Composition](#).
2. 2025-05-22T18:10:00 Immutability:
  1. 2025-05-22T18:16:00 Object-oriented technology serves change states.
  2. 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
  3. 2025-05-22T18:17:00 As is of the need for database storage.
  4. 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
4. 2025-05-22T18:31:00 Practical need for recursion?
4. 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 [What am I learning... as I progress?](#) Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
```

- ```
GO
RECONFIGURE WITH OVERRIDE;
GO
```
5. 2025-05-31T06:22:00 Lazy evaluation ... is a scenario for LINO  
(Ben Weidig, 2023-05-09).

**Instruction**  
 Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGo table manages major and minor column relationships. The URI and IHaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should be the custodian? Is the monitor, automatic?

**lang attribute**  
 As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 who speaks, on... authority?

- A data modeler uses data definition language (DDL) to design the information container.
- In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
- In 2007, when I was looking for work, I modeled the HaveDecidedToWorkOnAGraduateImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

Dean, 2018-01-09).

- **Alphanumeric:** Monetary values vary according to inflation and foreign exchange rates.
- **Unit of Measurement:** Age stays constant for a year?
- **Individual versus (VS) general:** The Temptation of Christ... The 10 Commandments. What will expand? I choose...
- **The writing assistant may suggest word changes:**
  1. Spelling corrections.
  2. Verb grammar tense.
  3. Synonym versus (vs) opposite.
  4. Singular versus (vs) plural.
  5. Depreciated.
  6. Currency.
  7. Locality, regional, custom, preference.
  8. Anglicized.
  9. Religion.
  10. Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
- **Personal attention:** Longevity, Insertion, Customization, adaptation.

**When did he part ways... and when did he section ways?**

```
SELECT HisWordID, Dated, Word
FROM WordEngineering..HisWord HisWordLead
WHERE Dated >
(
    SELECT TOP 1 Dated
    FROM WordEngineering..HisWord HisWordLag
    WHERE HisWordLead.HisWordID < HisWordLag.HisWordID
    ORDER BY HisWordLead.HisWordID
)
ORDER BY HisWordID DESC
```

Completion time: 2025-09-13T19:29:39.0388615-07:00

```
SELECT HisWordID, Dated, Word
FROM WordEngineering..HisWord
WHERE (1 < 1)
OR (HisWordID BETWEEN 167263 AND 167263)
OR (HisWordID BETWEEN 166552 AND 166552)
OR (HisWordID BETWEEN 166267 AND 166267)
OR (HisWordID BETWEEN 166209 AND 166209)
OR (HisWordID BETWEEN 166552 AND 166552)
ORDER BY HisWordID DESC
```

2025-09-08T14:05:00 Before you can search...

2025-02-19T12:20:00 What I offer of the truth?

1. Command-line interface (CLI)?
2. No .NET Core support
3. 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
4. The author does not make use of Microsoft SQL Server synonym support
5. The author rarely uses Microsoft SQL Server soundex support
6. Only English, there is no multi-language support
7. Limited Bible versions, dictionaries and commentaries
8. Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
9. Microsoft SQL Server will support Regular Expression (Regex)

1. 2024-10-04T09:07:00 Familiarize with the database schema, data dictionary, and entity-relationship model.
2. 2024-10-04T09:25:00 Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generations' desktop applications. Data entry column attributes include autofocus, for, placeholder required, size, type, value, etc. as much as possible, initially accept the default values, with, for example, the date columns. You may adjust and be precise, later.
3. 2024-10-04T09:44:00 Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTIFY\_INSERT, DBCC CHECKIDENT statements.
4. 2024-10-05T02:44:00 This is what I am unable to do with the graphical user interface (GUI), this is what I am inspired to do. 2024-10-05T02:59:00 Microsoft Office... Hypertext Markup Language (HTML). Why not... the machine responds to do? 2024-10-05T03:01:00 God has equipped him to do the same... as I
5. 2024-10-05T03:05:00 What do I need the other person... to do?
6. 2024-10-05T05:00:00 Need after 2024-10-05T05:10:00 (Likins S-9): E. F. Code in 1970, proposed the relational database.

7. Primary key  
The primary key for the url tables is the url column. When an user attempts to insert a duplicate url, the 2026-07-16T10:54:00 database updates an existing url URI. Uniform Resource Locator. URI: Uniform Resource Identifier (IRI).

- The Jewish day begins at 6pm.
- Naphtali was either listed in the Bible as the 6th or 8th son of Jacob
- Moses' leadership commenced in his third season.
- Jesus' beginning miracle was turning water into wine.

(Jack Hyman, March 2024).

Time for?

- Birth ( [Acts 7:20](#) )
- Family ( [Acts 5:31](#) )
- People ( [1ststess 1:8](#) )

## Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, databales, datarows.
- The author's familiarization with JavaScript meant client-side work.
- [What I am ood at doing...is what He is ood at making](#) ( [Genesis 41:32-57](#), [Genesis 1:1-1:2](#), [Genesis 4:26](#) ).
- Derivation...variety: Processing of a word spoken by God to the author is initiated by [GetAPage.html](#)
- 1. [GetAPage.html](#) serves as a gateway to specialized links.
- 2. [GetAPage.html](#) saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: [Do you write it as a manual? Do you write it as describing the functionality](#) ( [Daniel 9:24](#) )?

## O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

## Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... [Why I do it?](#)

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.

- [Where are the differences...companion?](#)
- [Experimenting...as the same?](#)

## Influence

- Data:
  - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
  - For over 2 decades, the author has continuously received word that he constantly records and queries. [Singles2](#)
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
  - Language translation
  - Familiarity with the subject and tradition. Apply domain knowledge.
  - Maturity and relevance to our time
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. [We all make our following](#).
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

## This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reorganization may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

[Our companion...our trade](#) ( [1 Samuel 25](#) ). [To be conformable of age](#).

## Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

## What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

## Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together ( [Joshua 1:8](#) )

## Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

## Laws of Communication

- The Law of Credibility:
  1. HisWord table Word Column: As much as God spoke it
  2. Period of Time tables: With respect to time
  3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
  4. GetAPage.html HisWord section: Time variant
- For a period of time...we are as we seem we are? What needs a success ( [Genesis 4:7](#), [Matthew 14:8](#), [Mark 6:25](#) )?

(John Calvin Maxwell, 2023).

[What do I desire...as part of significance?](#)

1. Moses? Prophet ( [Exodus 4:10-16](#), [Numbers 12:6-8](#), [Deuteronomy 18:15](#) ).
2. Abraham? Seed ( [Genesis 17:3](#), [Genesis 15:2](#), [Genesis 22:2](#), [Genesis 22:12-18](#), [Hebrews 11:17-19](#) ).

## Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was lile eyan mi lon lo yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

- Autobiography

(Charles M. Kozierok).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to \*, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supersedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order, Data is also rankable by clicking on the table's column header.

#### Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

#### Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

#### Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

#### Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

#### HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable ( [1.Samuel 3:14](#) )

| For                         | Against        |

#### Typing Assistant

What are we  
collaboration  
with [1.Samuel 3:14](#) )? This is a  
long trend of  
disruption... word  
resonances with  
AlphabetSequence  
(Index, Scripture  
Reference), [These  
are edits](#). A record  
is insertable only  
once. There may be  
multiple updates.

| For | Against |
|-----|---------|
| Man | Machine |

#### Numbers in themes

- He expressed ood as how He felt ( [Genesis 1:4](#), [Genesis 1:10](#), [Genesis 1:12](#), [Genesis 1:18](#), [Genesis 1:24](#), [Genesis 1:25](#), [Genesis 1:31](#), [Genesis 2:9](#), [Genesis 2:12](#), [Genesis 2:17-18](#), [Genesis 3:5-6](#), [Genesis 3:22](#) ) .
- He expressed start and end of time ( [Genesis 1:1](#), [Genesis 1:5](#), [Genesis 1:8](#), [Genesis 1:13](#), [Genesis 1:19](#), [Genesis 1:23](#), [Genesis 1:34](#), [Genesis 2:1-4](#) ) .
- King of the Jews ( [Matthew 2:2](#), [Matthew 27:11](#), [Matthew 27:29](#), [Matthew 27:37](#), [Mark 15:2](#), [Mark 15:9](#), [Mark 15:12](#), [Mark 15:18](#), [Mark 15:26](#), [Luke 23:3](#), [Luke 23:37](#), [Luke 23:38](#), [John 18:33](#), [John 18:39](#), [John 19:3](#), [John 19:19](#), [John 19:24](#) ) .

#### To be actual things

- Pronunciation ( [Luke 1:13](#), [Luke 1:66](#) )
- Application ( [Luke 1](#) )
- Spelling ( [Luke 1:64](#) )
- Reference ( [Matthew 11:14](#) )

In telling the future, there are two parts: prophecy and fulfillment ( [Revelation 19:10](#) ). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

#### What prize at the target?

| What prize at the target?                                                         |                                                       |                                                               |
|-----------------------------------------------------------------------------------|-------------------------------------------------------|---------------------------------------------------------------|
| Prize                                                                             | Target                                                | Scripture Reference                                           |
| <a href="#">Known.exe</a>                                                         | Diversified language                                  | <a href="#">Genesis 11:9</a> , <a href="#">Revelation 7:9</a> |
| <a href="#">http://github.com/KenAdenji/WordEngineering/tree/main/ITS/Gradual</a> | I have decided to work on a gradual improving system. | <a href="#">Psalms 133</a>                                    |

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in:

| .aspx                                                                                                       | .aspx.cs                                                                                                       |
|-------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| <a href="#">http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenance.aspx</a>                   | <a href="#">http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs</a>               |
| <a href="#">http://github.com/KenAdenji/WordEngineering/blob/main/ITS/Gradual/Contacts/ContactList.aspx</a> | <a href="#">http://github.com/KenAdenji/WordEngineering/blob/main/ITS/Gradual/Contacts/ContactList.aspx.cs</a> |

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

#### logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w:c  
sc-status sc-substatus COUNT(ALL *)  
200 0 185115  
304 0 9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.  
HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w:c
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, Max(time-taken) AS MaxTime, Avg(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC " -i:w:c  
cs-uri-stem Total MaxTime AvgTime

Execution time: 84.46 seconds (00:01:24.46)

#### Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.

2. A project cost is its work hours. A work day is 8 hours. A work month is =176 work hours. A work year is =2000 work hours.

3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.

4. To predict productivity? Re-use.

5. Metric:

- Executable Size Metric: Is the code largeness. It does not fully consider the uninitialial array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
- Machine Instructions Metric: This is the size or count of the machine instructions.

- Appendices
- Background
- Prospectus and Fulfillment
- Autobiography

- Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
  - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
  - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
  - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.
- (Randall Hyde).

|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|-----------------------------|---------------------------|
|                                | Sample Specification and Categories                                                                                                                                                                                                                     | Constraints | User Specification (Demand) | User Specification (Want) |
| Function<br>How it works       | The current work meets the design of an Intranet. The test environment.<br>1. Performance<br>2. Energy                                                                                                                                                  |             |                             |                           |
| Aesthetics<br>How it looks     | 1. Geometry ( e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX. )                                                                                                               |             |                             |                           |
| Quality<br>How well it is made | 1. Materials<br>The author's work is software specific.<br>2. Cost<br>Open-source<br>3. Manufacture<br>While it is Microsoft-centric for the back-end (.aspx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, js, .css). |             |                             |                           |
| Safety                         | 1. Time<br>The time duration is minimal.<br>2. Transport<br>The work is done on one computer.<br>3. Ergonomics<br>The doctorate work consisted of a proof-of-concept that is easily replicable.                                                         |             |                             |                           |

(DeLean Tolbert Smith).

Brainstorming

| Brainstorming             |                                                                                                              |
|---------------------------|--------------------------------------------------------------------------------------------------------------|
| Strategy                  | Description                                                                                                  |
| Focus on quantity         | AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.  |
| Wait to judge             | AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?                 |
| Think outside the box     | While the initial focus was on the Bible, written word; research now includes spoken word.                   |
| Combine and improve ideas | The author solicits input from others.                                                                       |
| Keep focus on the problem | Database recording resulted from the effort to determine when? The author has concentrated on this timeline. |
| Set a time limit          | Elaborous work is avoided.                                                                                   |

(DeLean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(DeLean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (V5) buy

(DeLean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(DeLean Tolbert Smith).

- To know my part as His?
- [Get it? Mainframe.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
  - [I have decided to work on a gradual immersion system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
  - What are you able to do now that you weren't able to do before? [To recognize the following as I \( 2 Samuel 3:32 \) ?](#)
  - [Who it comes to \( Hebrews 11:24 \) ?](#)
  - [What is the following? List of C-family programming languages](#)
  - [The mechanism of selecting people?](#)
  - [What notion of the same do I have?](#)
  - [What I keep member of \( John 12:12 \) ?](#)
  - [What did he find as suitable for him \( Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27 \) ?](#)
  - [What did he find re-occurring as him?](#) Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
  - Yield to the main thread: The PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
  - Optimize your rendering patterns:
    - Eliminating layout thrashing: 2025-07-11T18:17:00 [AJAX... only refresh updates](#).
    - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
  - The author does not use inline JavaScript.
  - The author minimally uses internal JavaScript for page-specific event handlers.
  - The author always uses an external JavaScript file, [2432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else \( Mark 7 \) ?](#) 2025-07-12T16:44:00 [What did he do?](#) [How did I do \( Luke 1:43, Luke 1:44, Matthew 3, John 3 \) ?](#)

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abimei's Law](#) comes into recognition in [GetAPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

What did he see as his? A remodelled of the last? Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14 )?
The author will want a conciliation with time?
AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?
That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God ( Genesis 3:8 )?

### Description

#### Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

#### Computer Listing

The software is available at <https://github.com/KenAdenji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

#### Technical Field

Seeing the Bible as enlightening to man.

#### Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated [Bapt2](#). The author suggests that Baptism of the Holy Spirit ( Acts 1-2 ), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

| Keyword                  | Scripture Reference |

(Alison Cox).

### Database Modeling

#### Entity-Relationship (ER) Model

##### Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

##### Attributes

The Holy Spirit informed the Word.

##### Identifiers

Previously, the author thought of the word as unique.

##### Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

##### Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

##### Cardinality

##### Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

##### Minimum cardinality

There may be no contact details for a contact.

##### Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

##### ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

- You are still partial to self

- Greatest ([Matthew 22:36-40](#), [Matthew 18:1-4](#), [Matthew 23:11](#))
- New ([John 13:34](#), [Hebrews 8:13](#), [2 Corinthians 5:17](#))
- 2...1 ([Genesis 2:24](#), [Genesis 41:25](#))

- Baptism of the Spirit (Luke 24:49, 2 Thessalonians 2:7)
- Time representation (Matthew 24:14)
- Trade of man (Revelation 13:16-18)
- No changes to the Word (Deuteronomy 4:2, Revelation 22:18-19)
- End-times (1 Peter 4:7, Genesis 6:13)
- Recompense (Job 42:10-17, Job 1:2)

2024-11-05T02:41:00 Who's personally... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does? I have not? 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 To delegate the use? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

1. 2024-11-03T04:26:00 Mandatory: it is absolutely essential that the database be accessible, and at a limit data entry is done punctually, SQL Server is a service
2. 2024-11-03T04:52:00 Significant: What you do with so ever? Microsoft SQL Server Management Studio.

In looking at the Bible, a decision was made to separate it into 3 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moslems, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part.... to follow the truth. 2024-10-28T06:06:00 What input has He contributed... that should be my output? I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

The 3 private sectors jobs I held in Charlotte, North Carolina (NC) were:

1. At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At McKee Real Estate, I worked on a R-base 5000 application.

These 3 non-academic Central Piedmont Community College (CPC) tutor jobs offered me the opportunity to complement my programming career with writing.

Initially, I registered the trademark, WordEngineering, after a book, Ocean Series, I afterwards, was issued the domain name, www.JesusTheLamb.com. [Revision 21-23, Revision 21-23, Revision 21-27]. At Baynet.com, I learned how to use Microsoft VisualStudio and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honyaku Center (DHG). I also copied code from ASP.NET Unleashed by Stephen Walther. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with a Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). [2014-10-19:07:30-74] What obviously did He use... to later Him? With HTML... you have elements and attributes. Choosing... to place alike. I personalize... the change I use Google to check my terminology, and later correct my grammar. [2014-10-19:04:02:00] Begin as a representation. [2014-10-19:04:24:00] What will contain... as... instance of myself.

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.  
2024-10-17T21:38:00 I take the spirit.... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

- God chooses people to work with. For example, Abraham ( [Ezekiel 33:24](#) ).
- Consistency with the Bible ( [Genesis 25:23](#) )?

1. IBM PC compatible;

At Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.

- The computers were IBM, Apple, Radio Shack
  - The programming languages were Microsoft's Basic and Borland's Turbo Pascal
  - The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE
2. IBM employee:
- In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
  - In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails
3. IBM event:
- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
  - In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
  - In San Francisco, California, the author attended an evening after-work party that was organized by IBM
  - In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How-to verify the work of the spirit?

- Is it compatible with the Bible ( [John 10:30](#), [John 17:22](#), [1 John 5:8](#) ) ?  
Is this a link ( [Genesis 41:32](#), [1 Corinthians 15:45](#), [Acts 9:3](#), [Genesis 5:3](#) ) ?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our vision.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a result of what? Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect... out of the Bible ( Daniel 5:31 )?

- 1. When is the Bible specific about time ( Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54 )?

How admissible is the word ( Genesis 41, Daniel 2 )?

GetPage.html depends on the word.

What did I fit into a table?

1. Ark of the Covenant
2. Temple
3. Jerusalem
4. Judah
5. Israel

What did He see Himself as?

1. Joseph ( Genesis 37:3 )
2. Moses ( Acts 7:25 )

Robert Law Joss

- 2024-06-05T04:49:00 Technically... reliable? Maturity... saturation? Information Age, personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), labor, cost, support, manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.
- 2024-06-05T04:49:00 What do we deserve as our own... what do we reserve as others?
- 2024-06-05T04:49:00 Are we doing... the part of God? 2024-06-05T04:49:00 What was I working for? 2024-09-16 Bob Joss said North Atlantic Treaty Organization (NATO). 2024-06-05T05:07:00 Hmm. We're having trouble finding that site. We can't connect to the server at www.google.com. If you entered the right address, you can: Try again later Check your network connection Check that Firefox has permission to access the web (you might be connected but behind a firewall) 2024-06-05T05:25:00 2015-10-23DoctoralDissertation.pdf 27 pages. Is America a godly nation? Is NATO a godly organization? 2024-06-05T05:44:00 E:WordEngineering>git push fatal: unable to access 'https://github.com/KenAdeniji/WordEngineering/': Could not resolve host: github.com 2024-06-05T06:08:00 https://en.wikipedia.org/wiki/The\_Network\_is\_the\_Computer\_2024-06-05T06:23:00 Is Microsoft on the network? 2024-06-05T06:24:00 faeces. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55.053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

| What offerings I have for people? |                 |            |                     |
|-----------------------------------|-----------------|------------|---------------------|
| Speak face-to-face                | Dream or vision | Commentary | Scripture Reference |
| Moses                             | Other prophets  | Leader     | Numbers 12:6-8      |
| Jesus Christ                      | Other teachers  | Authority  | Matthew 7:29        |

| What does he involve?  |       |                                               |
|------------------------|-------|-----------------------------------------------|
| Word                   | Actor | Scripture Reference                           |
| Holy Spirit and people | Adam  | Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26 |
| After Mine own heart   | David | 1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3     |

Effect of the Progress ( Luke 1:1-4, Daniel 9:22-23 )?

- 1...many ( Genesis 1:16, Genesis 1:26-2-4, Daniel 9:2 )
- More at the same ( John 15 ).

When did Israel... seek no region... as its own ( Acts 1:6 )?

1. The prophets
2. New Testament
1. The Gospels: King of the Jews, the disciples
2. Pauline Epistles, General Epistles
3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have storaged using people as myself.

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. How is your task... durable?

- 2024-11-20T05:38:00 Ordering
- 2024-11-20T07:59:00 Do I make a separation between physical and spiritual?
- Forerunner: Jesus and John the Baptist ( Luke 1, Matthew 3, John 3:22-36, Matthew 12:12-13 )
  - Levitical priesthood ( Hebrews 7:14, 1 Samuel 3, Numbers 3 )
  - Sitting on a high place: Humble... exalt ( Luke 14:7-11 )
  - Baptism: Washing of feet ( John 13 )
  - Marriage: Younger before the firstborn? ( Genesis 29:26 )

| What will count... forever?                 |                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Divided according to the children of Israel | Deuteronomy 32:8                                                                                                                                                                                                                                                                                                                                                                                                         |

What I use people for ( Job 35:6-8 )?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to... that you may find me useful ( Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2 ).

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
  2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.
- God said. What are the other activities of God? The spirit of God moved. He saw it was good ( Genesis 1 ). When one finds good? That is the meaning ( Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26 ). We demonstrate... how we are. It is not misleading... That is the decoration ( Revelation 12:10 ). Appreciate as ( Matthew 16:18 )?

What is the supplement?

| Word                 | Commentary                                            | Scripture Reference                                |
|----------------------|-------------------------------------------------------|----------------------------------------------------|
| Greatest Commandment | Love the LORD thy God. Love thy neighbor as thy self. | Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31 |
| Forerunner           | The law and the prophets were until John              | Luke 16:16                                         |

Is this generation the same?

| Word     | Scripture Reference        |
|----------|----------------------------|
| Seed     | Isaiah 53:11, Genesis 3:15 |
| Lead     | Matthew 23:9, John 15:15   |
| Interval | Hebrews 14:39-40           |

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present ( Deuteronomy 32:8 )?
- It is one man doing... it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way ( Genesis 1:26 ).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer)

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Tell me intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? ( 1 Corinthians 15 ) I spoke to task.

| Event      | Feature                | Scripture Reference                                  |
|------------|------------------------|------------------------------------------------------|
| Creation   | Image of our ancestors | Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38 |
| Redemption | Image of the Son       | 1 John 3:2                                           |

Do you know mine? ( Deuteronomy 18:15 )

| God             | Actor                  |                                                      |
|-----------------|------------------------|------------------------------------------------------|
|                 | Moses                  | Jesus                                                |
| Name            | Jehovah ( Exodus 6:3 ) | Father ( Matthew 23:9 )                              |
| Place of Origin | Egypt ( Exodus 2:18 )  | Bethlehem ( Matthew 2:1-18, Luke 2:1-20, John 7:42 ) |

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place grouping... man grouping 2025-04-1804:06:00 ( Genesis 48:4 )?

2025-04-1706:16:00 Do we choose... a realization of Him?

• 2024-07-09T18:30:00 He has always out it in... context of time.

• 2024-09-15T13:39:00 How our part... is never... design as lasting?

• 2022-08-08T19:00:00 Dispossess the Devil?

• 2024-07-23T09:22:00 To be an African... Nation.

• 2024-09-24T11:01:00 I have knowledge share to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.

• 2022-10-08T11:08:00 To work as a part of Me?

• 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestinians?

Associated culture

1. Associated culture ( Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5 )

What I am rendering? To what particular use... is me ( Matthew 16:18 )?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony ( Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45 )?

What is the reward of the past?

From that day ( 1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 27:46, John 11:53 )...

1. Salvation ( Exodus 14:13 )
2. Commit ( Luke 23:46, Psalms 31:5 )

What personifies the time?

1. First and Last Adam ( 1 Corinthians 15:45 )
2. Fireborn ( Romans 8:28, Colossians 1:15, Colossians 1:18, Hebrews 12:23 )

What does authoring the word do? To shed as much light as our opening ( Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11 ).

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Included to love babe I won... including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness ( 1 Timothy 6:12 ).

How do you reference the Bible?

| Event | When does man decide His future is as reminded? Connecting the past as I use. | Genesis 1, John 1   |

To Reckon as Size

- Light ( Genesis 1:16 )
- Sabbath ( Genesis 2:2-3 )
- Autonomy ( Genesis 4:12 )

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?
- What does he want as a set? 0 pe. In Yonuba?
  - Complete
  - Late
  - Call
  - Thanksgiving
- Where am I, as a human being?
- The life of acquiring something as myself.

Word Inference

- A lot of Yonuba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword noun.
- Letters in the English language?
- The word? Is to associate the reference.
- How could I collaborate fact with what I know?

There is more to you than you are. ( [Ephesians 3:18](#) ).  
We want personal data, when is public data sufficient?  
From...until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Wedgac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Quality Assurance

- [Quality Assurance](#)
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [JSHint](#), [ESLint](#)
- Questionnaire: [BibleBank](#), [JSBible](#)

Prepared for Time

On 2019-04-04T09:00:00 [andre.davydov@popcorn.com](#) will telephone me about the role with Google's co-founder Larry Page [jgbs.lever.co@lithhawk.aero/201c6d9a-2d8a-4727-a345-d4a93d6dccc77?agencyid=3b8e0b44-7127-4709-ad21-6ebbee57f403](#) Andre Nguyen asked how I spend my day? 2024-01-10T11:12:00 [You have tried to supplement... what God has given you](#), 2026-03-03T11:24:00 [He commissions... our way](#), was reading the Bible... He was giving me a word.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. [How relevant is Your word to our opinion?](#) This projection may result in entries of new records in the Remember and APass tables. [Where are people... his relation?](#)

However, he is present, that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-03T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555

[How do we develop... our past time?](#) ( [Genesis 37:13-20](#), [Daniel 6:5](#) )?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

[What we do minimally... how we do maximally.](#)

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- [Search Engine?](#) Requires Internet access.
- [ScriptureReference.html](#) Requires Bible knowledge and place in the Bible.
- [BibleWord.html](#) Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance ( [Matthew 10:19-20](#) ).

• Where am I, resemblance of how I am made ( [1 Corinthians 14](#) )?

What does He choose as example?

- God rested on the Sabbath day ( [Luke 23:56](#) )
- Jesus Christ ( [Daniel 9:24-27](#), [1 Corinthians 15:45](#), [1 Corinthians 15:47](#) )
- Man such as King David ( [2 Kings 14:3](#), [2 Kings 16:2](#), [2 Chronicles 28:1](#), [Amos 6:1](#) )
- Place such as Sodom ( [Matthew 10:15](#), [Matthew 11:23-24](#), [Mark 6:11](#), [Luke 10:12](#), [Luke 17:29](#), [Romans 9:29](#), [2 Peter 2:6](#), [Luke 1:7](#), [Revelation 11:8](#) ).
- Other living things ( [Numbers 22:21-31](#) ).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy ( [2 Samuel 12:14](#) ). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence ( [Isaiah 23:15](#), [Isaiah 23:17](#), [Jeremiah 25:11](#), [Jeremiah 25:12](#), [Jeremiah 29:10](#), [Daniel 9:2](#), [Zechariah 7:5](#) ). Listed below are some of the repeated reinforcements.

Samson's Birth ( Judges 13 )

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazirite son ( [Judges 13:5](#) ).

The same angel appears to Manoah and his wife ( [Judges 13:6-25](#) ). The angel reinforces the their responsibility and defers reverence to God.

The Birth of the Messiah ( Luke 1 )

Foretelling the birth of John the Baptist ( [Luke 1:5-25](#), [Malachi 4:5](#) ). Transitioning the present to the after ( [Luke 1:12](#) ).

Foretelling the birth of Jesus Christ ( [Luke 1:26-38](#) ). Continuing the Davidic line ( [Luke 1:32-33](#), [2 Samuel 7:12-13](#), [2 Samuel 7:16](#) ).

The Baptism of Cornelius ( Acts 10 )

The Bible does not explicitly mention the citizenship of Cornelius, but it mentions his rank as a centurion in the Italian band ( [Acts 10:1](#) ).

Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining ( [Luke 5:4-11](#), [John 21:3-6](#), [Matthew 17:24-27](#), [Acts 10:9-16](#) ). What I bring to Him; is me alone, to value Him.

Full Position

The first occurrence of the word, full, in the Bible, occurs in ( [Genesis 14:10](#) ); and is in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died, full of years, and the son of promise, Isaac, died, full of days ( [Genesis 25:8](#), [Genesis 35:29](#) ); The last occurrence of the word, full, in the Bible, occurs in ( [Revelation 21:3](#) ). Living a presence ( [Jeremiah 28:11](#) ). To creating a future full of all. To creating a future free of all.

One Chance; Seem the Rest.

Our LORD's prayer is a communal prayer; directed to the one God ( [Matthew 6:9-13](#), [Luke 11:2-4](#) ). Please note that it is Jesus; teaching this prayer; so He doesn't refer to Himself or the Holy Spirit explicitly; as in another passage, when He mentions Himself as the bread ( [John 6:31-35](#) ). He explains the truth; that we may fall short of it, by explicitly referring to the Father. He is alluding to the events in the apocalyptic books, Daniel and Revelation. We are on earth, and we have an earthly father; where we are, is not where, we wish and will to reside ( [Matthew 6:9](#), [Luke 11:2](#), Daniel 2, Revelation 5 ). When no matter, where I go; this is how, I am found ( [John 20:17](#) ).

To set everything true

The word, [true](#), occurs in seventy-seven verses in the Scripture Bible, and there are eighty-one occurrences. True, first occurs in Joseph's interaction with his brothers ( [Genesis 42:11](#), [Genesis 42:19](#), [Genesis 42:31](#), [Genesis 42:33](#), [Genesis 42:34](#) ); Jacob had colluded with Rebecca, his mother, to get Isaac, his father's, blessing; God shows that Joseph will have elevation over his parents and siblings. There are ten occurrences of the word, true, in the book of ( Revelation ); in response, to God.

To Whom Masculine?

How the Bible compares the gender?

Man, after his Fall

During Creation, God asked all living things, be fruitful and multiply; God asked Adam to name the living creatures, and God required Adam to take care of the Garden of Eden, but this taking care is to dress and keep the garden; there is a role for man, the tree of the knowledge of good and evil, and the tree of life. God did not specify the welfare of animals. Out of Adam, God made a helper for Adam, Eve.

After the Fall of Man, Adam's labor will be thorough; and there is enmity between the serpent and Eve, and each other's seed; and Eve will have pain, during child-birth.

God made coats of skins, and clothed them; it is our presumption, that the clothing is from living things, generally perceived as sin sacrificial animal(s), but since this clothing is not specified, an alternative, is that it is a plant, or another creature entirely. God created an adult male, Adam; and his female counterpart, Eve ( [Deuteronomy 2:14](#), [John 5:5](#) ). There is no mention of Adam's activity, after the fall of man; as Eve bares and name their children; Adam's earlier effort, which was to cater for the Garden

Will SQL deliver all the purpose in the Bible?

Such as, will a query language find the mother, father, and child relationship?  
`knew wife` SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE 'knewd' and KingJamesVersion LIKE 'twifef'  
`wife child` SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE 'twifef' and KingJamesVersion LIKE 'schildf'

WordToNumberHelper.cs

Numbers in the Bible are written out as words. The author made effort to parse these words and find the numbers, but it was not totally successful, largely because of the arrangement of the numerals.

Translate the Original AlphabetSequence C# Code to the Other Programming Languages

AlphabetSequence was first implemented in the C# programming language [AlphabetSequence.cs](#) Later work, saw translation to:

- [AlphabetSequence.cs](#)
- [AlphabetSequence.cxx](#)
- [AlphabetSequence.go](#)
- [AlphabetSequence.java](#)
- [AlphabetSequence.js](#)
- [AlphabetSequence.py](#)
- [AlphabetSequence.rs](#)
- [AlphabetSequence.sh](#)
- [utf\\_AlphabetSequenceIndex.sql](#)
- [AlphabetSequence.vb](#)

Perhaps, other programming languages should have their own sample code. The author is only conversant in English and Yoruba, additional work will be to see the use in other lingua franca. And the oriest said, Are one only for me?

Data Residence

Where should the data reside? Database, JSON or XML files?

Which side, the love felt?

SQL returns records in rows; there is a result set. Would we, be able, to amalgate the result set? For example, how can we, find themes in the Bible? When you enter a topic, can we return a trend? Clustering, can we return a number; as its present ( [1 Kings 19:11-13](#) )?

Where I arrive, is where He as conclusively use

Initially, when I got a word, I made efforts to expound, on this word; but now, I share the word, and wait on God to reinforce the word, or share a new theme.

2019-05-30 My ancestral home is Ile-Ife, the site of the Oronmijan staff. My search for the word, Staff inspired relating the Bible to my life. Staff, first occurs in, ( [Genesis 32:10](#) ). In my ninth year, my twin sibling and I, relocated from Ile-Ife Staff School to Lagos. In our tenth year, we visited London. In my 32nd year, I re-located to the United States of America (USA).

I Am letting myself: be many as a people.

God intended man, to be a personal use. The work of the author is an individual effort, and it targets a singular person. The author separates his work into web pages, but the user may click on a hyperlink, to get more information, and sometime do additional work. The work of the author, builds on the efforts of other people, like the Bible, dictionary and commentary. The HisWord table and associated queries, only currently refers to the contribution of the author. How could we, specialize our work? Who uses, and for what? The setting, is it normal? What are the influence of God, as a person? What are His contribution, solely to man? What part of Him, as He analyzed, as a person? What role, as man, placed on Me? What stimulate you, as a human being; is where My opinion placed? The author read the Bible and listened to His word, prior to the introduction of AlphabetSequence. Where do we follow, His partnership? He has said the word; I have collaborated with Him.

Outstanding Work

The source code and schema are available at [Github.com](#). This means that the public can review and make updates to the original work of the author. This aged work is not up-to-date with the industry trend, such as cloud computing, mobile applications, decentralized ledger, nosql. Part of the justification for this immaturity; is the need to maintain a low entry point and capture a wide audience for its adoption.

Who's for social networking sites like WordPress, Github, Twitter, LinkedIn, Facebook, etc. When nothing without Me, is sufficient without Me, Where I retain,

I use [sgmmmsqlcheck.sql](#). I am proposing a specialization to correct scripture reference. For example, there are many questions and answers, but a further development is to automate the task of correction ( [Luke 3:23](#), [Matthew 22:41-46](#), [Matthew 22:28](#), [Mark 7](#), [Genesis 38](#) ). They are not one another.

When does He say a word, when does He put a thought ( [Daniel 5:25-28](#) )? Ability to say.

When does He talk in the past, present or future?

Which is the information container? The ActInGod table, Major column value, Comparative verse; supercedes the WordsInTheBible table; which is the exact word for the King James Version (KJV) and not all versions of the Bible; and doesn't take into consideration the English language British versus American spelling, such as favour versus favor, nor the generic word, such as, man versus men. When is this, anointing of the Spirit ( [1Samuel 2:26](#), [Luke 2:52](#) )?

Can you create a fictitious record in the Contact table, that meet later fulfillment. This record in the contact table will contain a word that is placeable in the title or company field/column. This information is substantive in the commentary column of the CaseBasedReasoning table. This is compatible to Ghost city. A bit column is setttable, for this contact. It allows to keep the contact ID as a foreign key. A record to be someone else.

The effort of the author is to share and comprehend the word of God. What can the author provide to the other; to substantiate the work of the author? God made man as similar to Him to see how life can be? If I spoke the same, how am I the same? I know, I am. The love of being the same supercedes feeling the same. Being in the spirit; is alluding to the sufficiency of men.

When did He immediately get what He wanted?

| Who          | What                       | When   | Where                 | Why   | Scripture Reference                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

Site indexed?

2026-03-14T21:00:00 Search on Google by data entering site:JesusInTheLamb.com, and Google will return a list of pages it has found on the site.  
\* (Peter Kent, 2004).

Terminology - Words and Meaning

When you write a thesis, it is a paradigm work, shift in thinking, and it should contain a terminology section. The practice of the author will be to list existing words, and include their meanings. For technical jargons, the author will rely on the Internet, as a definition resource. If the author is introducing a new word, the author will explain its meaning, but this is rare.

WordEngineering Created of an intellect.

Client-Side Programs

The norm of today is to build with HTML, JavaScript, CSS.

Database

The database of choice is Microsoft SQL Server. Prior to specializing on SQL Server, the author experienced fifth generation scripting languages such as dBase, R-BASE, Clipper, Access, FoxPro; other relational databases, like Oracle, SQL Anywhere from Watcom, Sybase, and Informix. When the author applies the Microsoft implementation of SQL, Transact-SQL and [SQL CLR or SQL CLR / SQL Common Language Runtime](#) the author risks not being vendor-agnostic.

HyperText Markup Language (HTML)

The document that the reader is currently reading, uses rudimentary formatting and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions.

Based on the user's request, the application generates the result sets, on-the-fly.

HyperText Transfer Protocol (HTTP)

The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously.

HTTP Client (or Web Browser)

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and it gives us the opportunity to test our Microsoft implemented software in a non-proprietary, vendor neutral environment. For compatibility with standard, the author performs tests on Microsoft's Internet Explorer (MSIE), Google's Chrome, mobile telephones emulators and simulation.

HTTP Server

The author use Microsoft Internet Information Server (IIS), the author has experience with both the Apache HTTP Server, Apache Tomcat Server. The author preference for IIS, includes its tight integration to the Windows Operating System, SQL Server and .net framework.

Latency

This is the amount of time, it takes to respond to request. The use of AJAX, helps to decrease the duration, the length of time, it takes to load-up a page.

Linking

This dissertation depends on the structural navigation links for the table of contents. The associative links help to drill-down to particular scripture reference and Bible words. The author also lists, outbound links, re-direct to source web references, as in the bibliography section. Registration with search engines is one of the ways to encourage incoming links.

Machine Learning

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P, if its performance at tasks in T, as measured by P, improves with experience E (Goofellow et al. 2016). Machine Learning takes as input: data and answers and derives rules (Bleschi et al. 2020).

Page Size

The HTML file sizes are small; since the author distributes the work between HTML, JavaScript, CSS and the back-end source files.

Page Title

The page title is a microcontent that serves as a prominent content in search engine listing, bookmarks, history lists and the page header on the browser.

Semantic HTML

This is the choice of a particular HTML tag, to reinforce its meaning and content.

Server-Side Programs

Ever circulating?

Style Sheet

The author prefers linked to embedded style sheet.

Web Application

The everyday web pages of the author include:

1. [GetAPage.html](#)
2. [BibleWords.html](#)
3. [ScriptureReference.html](#)
4. [DateDifference.aspx](#)

Autobiography

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi.

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
    1. An African American female senior, Gayle.
    2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
    3. Michael Poke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
  - My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning. 2024-12-25T22:00:00 What estranges... of the people?
  - I planned to build a traffic light for my project.
  - In a multicultural church where I was part of the congregation, Bernie Alspaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
1. 2024-12-25T19:12:00 When I had the option... I have acclimatized.
2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd.

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

- They had varying mother... but one father ( Genesis 32:28 ).
- 2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.
- 2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?
1. Post 9-year-old re-location from Ile-Ife to Lagos
1. Patriarch, brother Yemo
2. Captain of the Nigerian national hockey team
3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him
- Where did he serve... a people?
  - Where did I... remove myself from the past ( Genesis 31:41 )?
  - What part... are new?
  - Spending time... to reality?

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
1. In the year 2024, the author will turn 57 years old.
2. In the year 2024, Faith An Yao will turn 18 years old.
3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same... as me? I was getting training on how to... place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In-spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC.
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5. • I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 × 14 inches)
- I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual

• In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. [What do I need of a capable human being?](#) [What resemblance has he made?](#) ([Genesis 32:28](#), [Genesis 5:3](#), [Genesis 4:12](#) )? What word reminds ( [Mark 11:23](#) )?
