WordEngineering

Kehinde (Ken) Adewumi Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.
[Translate English... Yoruba](#)

Abstract

Thesis Statement: This dissertation introduces [AlphabetSequence](#) ([2 Corinthians 10:9-10](#)). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.cs](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places. The importance of this work?

- 2021-05-20T17:26:00 [Follow God as a character](#).
- 2022-11-29T12:53:00 [To track dates and words? And find meaning correlation](#).

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Messler of [Koinonia House \(KHouse\)](#) is worthy of note, faith ([1stThess 1:1](#)). The author is indebted to [Joy Schreyer](#), his Master's degree supervisor, at the [University of Technology, Sydney \(UTS\)](#), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object-Oriented Technology instructor; both also at UTS. The author makes mention of his colleagues at UTS; Decker Mendez, Cesar Orlando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate degree supervisor at the [University of Wollongong \(UOW\)](#), NSW 2522, Australia.

Theory

2004-11-10 www.JesusInTheLamb.com		
Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename		The default, for example, is index.html
Fragment		
It is not an e-mail address, since it does not include an at sign, @.		
It defaults to port 80.		
It defaults to the homepage.		

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior on 2004-03-23. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

2026-06-24T18:01:00 [What use is the word... according to you?](#)

1. Synonymous ([Genesis 22:8](#), [Genesis 22:13](#))
2. Domain name valid
3. Grammar correct

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key. There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=(1) AND [ChapterID]<=(150)))
```

will set the range restriction.

[There are individual chapters for each book.](#)

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=(1) AND [VerseID]<=(176)))
```

will set the range restriction.

```
SELECT TOP (1) BookID, ChapterID, VerseID, AmericanStandardBible, BibleInBasicEnglish, DarbyEnglishBible, KingJamesVersion, WebsterBible, WorldEnglishBible, YoungLiteralTranslation, ChapterIDSequence, VerseIDSequence,
    AccordingToManyNativeSpeakersID, Testament, BookTitle, ScriptureReference, ChapterIDSequencePercent, VerseIDSequencePercent, BibleReference, BookGroup, BookAuthor
FROM Scripture_View
ORDER BY VerseID DESC
```

Will say the longest verse occurs in the 19th book of the Bible, Psalms, and its 119th chapter; 597th chapter of the Bible, 16075th verse of the Bible.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWord.html](#)

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Design by contract](#) assertions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (V5) single L. An improvement on the current implementation is to use soundex to 2026-01-22T10:12:00 index the book title and determine the corresponding BookID.

The Scripture View's ScriptureReference Column

The SQL statement

```
dbo.udf_scriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Prophecy and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
  cast(BookID as varchar(6))
  + ','
  + cast(ChapterID as varchar(6))
)
FROM   Bible..Scripture
```

Another SQL statement

```
; with cte
(
  BookID
, ChapterID
)
as
(
  select distinct BookID, ChapterID
  FROM   Bible..Scripture
)
select cnt = count(*)
from   cte
```

The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)
```

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
```

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

```
SELECT COUNT(*) FROM Bible..Scripture
```

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
```

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
```

is supplementary.

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns / SOL](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Bane Hunt](#), who will talk of each word's specifics, and [Chuck Mosler](#) who noted that the first occurrence of the word, [love](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, KAA, is Karkas, meaning [door](#) ([Joshua 15:3](#)).

2026-03-30T11:30:00 I will assist if life doesn't share us apart — spread us apart. ([Genesis 1:16](#))? [Helkai](#) or [Hielek](#) translated part or portion ([Nehemiah 12:15](#) [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
```

is for determining the highest value. The SQL statement

```
SELECT COUNT(BibleWord) FROM Bible..Exact
```

is for determining the word count. The SQL statement

```
ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
```

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
```

is 789631; this is the count of the words in the KJV Bible.

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember APass](#), [ActToGod](#).

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-8](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English [which is being interpreted](#) ([Matthew 1:23](#) [Mark 5:41](#) [Mark 15:22](#) [Mark 15:34](#) [John 1:38](#) [John 1:41](#) [Acts 4:36](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [https://translate.google.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:30](#) [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 [And the merge is the money convert.](#)
2. 2015-11-03T02:17:00 [The specifics a language.](#)

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column [and loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

- Style of Writing

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3-5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:2-4](#)).

Microsoft Excel Server generates sequential numbers for the HiWorldID [Identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HiWorldID column may serve as the [primary](#) and/or [foreign](#) key, the backbone of the [Relational Integrity Constraints](#).

The Dated column is the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the [UTC-08:00 Pacific Time \(US & Canada\) time zone](#). There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord_view

The **HiWord** view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the **AlphabetSequenceIndex**, and the related **AlphabetSequenceIndexScripture** respectively. The author derives the **AlphabetSequenceIndex** from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The **AlphabetSequenceIndexScripture** is the books, chapters, verse separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identify above. The **AlphabetSequence** is like [Gematрия](#), [Misnor](#), [Hevrahi](#), [the method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. The **terminus a quo** DateFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy; the **terminus ad quem** DateToEnd is when a prophecy partially or entirely comes to pass. * (Koinonia House). **DateDifference** **days** is for calculating the difference between **terminus a quo**, versus **terminus ad quem**; the results are in days; **biblical years**, months, days; the **Common Era**. The inspiration for adding the **Common Era** was from **wikipedia.org** by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs (**Luke 4:19**).

APass

First, inside and last dates

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible

I saw 2 males who were standing beside cars. I approached them believing they were Germans, but they turned out to be Hindi. Scene 2: My twin siblings and I went out to eat fish at an Asian restaurant. When we were about to depart, the restaurant's male workers to the north mixed up our take-away food order, 10:30 label identifiers (Sergey 37-9-11). Scene 3: I thought of Sergei Brin when I was with some Asian males, to the east, inside a Sport Utility Vehicle (SUV) with a vehicle license plate with a label like Trust or Tarut. The Jews could kill me as their preservation or solution. Interpret: Hindi make-up 1/5th of the world population... attrition due to unbalance. 2026-02-01T12:00:00 At the intersection of Sward Drive and Crockwood Drive, south-east house. 4820 Sward Drive, Fremont, California (CA) 94555. <i>Who is relevant... as a occasion?</i> 2026-02-01T13:34:00 At Charter Square, Albertsons Lucky, and Dulhan Grocery. 2026-02-01T13:37:00 <i>The focus has been... HR children.</i>

Scales & Measurements		
Type of Scale	Commentary	Example of Scale
Nominal Scales	The numbers may serve as tags or labels which are quantitative with no values.	- Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these possit a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains us. - Telephone number
Categorical Scales		Dewey Decimal Classification used in libraries
Absolute Scales	An absolute scale is a count of individual, distinct items in the set.	- This may be the physical count of word occurrences in the Bible. - The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. - The SQL COUNT() function returns the number of rows that matches a specified criterion. - The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.
Ordinal Scales	An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.	- In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. - An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. - The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE. - The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.
Rank Scales	They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.	- Military ranks - Mohs scale for hardness (geology) of minerals - Scofield scale for the strength of peppers - Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response Turing test used in computing to determine whether the user is human in order to deter bot attacks and spam. The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	- HTML input range - CSS percentage

(Joe Celko, 2025-03-07)

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VersionID	Bible.Scripture_View.ScriptureReference	Bible.udf_ScriptureReference()

Determination is achieved through computed columns.

(Allen G. Taylor, 2024)

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	<pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5</pre>
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	<pre>SELECT * FROM Bible..Scripture_View</pre>

Query Type	Commentary	Example	Structured Query Language (SQL)
			WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)
Extremal query	It returns either the minimum or maximum extreme.	Statistics	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
Principle 2: Check Assumptions
- This whole thing started with keeping a work reference.
 - Even though Yoruba is the native language of the author, he still and invariably relies on translate.google.com.
 - The author depends on a typing assistant.
- Principle 3: Explore Contexts
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
- Principle 4: Anticipate Risks
The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
 - Hardware, software, or network failure
 - Vendor withdrawal of support
- Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
 - Inability to restore deprecated Microsoft SQL Server backup versions.
 - Command-line reverse-engineering of database script does not conform with the newly released data types.
- Principle 5: Assign Priorities
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
- Principle 6: Define Time Horizon
What period has God used?
- In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium (Numbers 1:3, Luke 2:42).
 - On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium (Numbers 4:30, Matthew 7:16).
 - In the year 2007 — generation time span: this masturbation will bring water. My 40th year (Numbers 14:33-34, Numbers 32:13).
- Principle 7: Generate Multiple Solution Options
How versatile am I... at amending others? I have to relay my perception to technology providers.
- Principle 8: Design Around Constraints
Relational databases offer the ability to set constraints.
- Data type
 - Nullable
 - Primary key and unique index
 - Foreign key
- Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
 - The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author, the WordEngineering database size, is currently 33390528 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1115.1
sp_spaceused	The WordEngineering database currently uses 32607.94 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 122966.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_mssqlver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. <u>Most select applies</u> to Bible..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <, <=, >, >=, >>	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, simply is this in use, != or/and !=.</u> <u>This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Overview for a date or number will search for particular types.</u>
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospects and Fulfillment
- Autobiography
- State of Writing

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later limit to required rows .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction '%%'
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, =, <=, >=, <>
Table join supersedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

1. Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
2. Install a DBMS.
3. Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
4. Create database. Microsoft SQL Server supports multiple instances and databases.
5. The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
6. The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
7. The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
8. Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. is in order of occurrence.

Predicate logic

The choice of SQL Server impose datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository		
Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdeniji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdeniji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdeniji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

1. Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalistic page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
2. 2025-12-01T20:01:00 Unnecessary date manipulation: <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> does 2 types of date calculations. These are the:
 - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DateFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordCray/Don'tFeelLeftAlone.html> 2023-02-17..2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
3. 2025-12-01T21:17:00 Excessive error checking: The author does not do error-checking, preferring to catch exceptions, for example in AJAX requests: <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js>

```
fetchHandler: async function
{
```

callback,
urlDisplay,
rowColumn
)
{
const postData = {
method: "POST",
headers: {
"Accept": "application/json",
"Content-Type": "application/json; charset=utf-8"
},
dataType: "json",
credentials: "include"
}
postData.body = JSON.stringify(fetchRequest);
try {
const response = await fetch
(
fetchUrl,
postData
)
.then(response => {
return response.json();
})
.then(responseJSON => {
var dataset = JSON.parse(responseJSON.d);
callback(dataset, urlDisplay, rowColumn);
})
)
} catch (e) {
urlDisplay.innerHTML += e;
};
};
}
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation, the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/Kendden/WordEngineering/blob/main/UIS/WordEngineering/WordUnion/GetPage.html> calls the <http://github.com/Kendden/WordEngineering/blob/main/UIS/WordUnion/GetPage.html> via the `http://github.com/Kendden/WordEngineering/blob/main/UIS/WordUnion/GetPage.html` method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultSet div will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

- The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers.
- What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.
1. The author extracts knowledge from data; by finding meaning to the word.
 2. The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
 3. The actionable insights take, so far, is to computerize the work.
 4. The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
 5. The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

1. Empirical, find implication from the Bible?
2. Theoretical, to determine a better way to doing work?
3. Computational, is human labor replaceable?
4. Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

1. The Bible is our primary source of data.
2. The author records information sources. This is either a person or media?

What you can do with Data

1. Data Acquisition: The Bible is available on the Microsoft Access database.
2. Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
3. Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
4. Visualization / Human Insights:
 - The raw data is viewable on the Microsoft SQL Server Management Studio.
 - The web service, .asmx, file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
 - The .html presents the result in a human readable format.

Defining Data

1. Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words.
2. Qualitative Data: These are rarely measurable and are personal interpretation.

A brief introduction to Statistics and Probability

At the beginning of the study, the author made a presumption that words are unique. Later the author found out that there are duplicate Bible verses.

(Microsoft)

Data

Structured and Unstructured

Structured data is alphanumeric put in row-column. Unstructured data is either text, image, audio, or video. This research is mainly structured data.

Standard

The author imports complete, not NULL nor empty data, such as the Bible and the dictionaries.

- [Title](#)
- [Abstract](#)

- [Autobiography](#)
- [Style of Writing](#)

4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the headers, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use CSS:after, since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, CF, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Detach](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.ezhaimtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <https://stackoverflow.com/questions/41906110/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML overweighs the newness of the JSON transport medium.
- HTTP Status Codes: jQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary. The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column. An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key. The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations. When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

- The alphabets and words make-up the author's work. The composition of the words is indefinite.
- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
 - The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
 - The null character is in the Word column, when there is only commentary.
 - Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (IsAlphabetic(word[index]))
    {
        alphabetSequenceIndex += ((int)word[index] - ascIIA + 1);
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete. The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.aspx	Query(word)
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookback scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right [.NET Framework Data Providers](#). The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.aspx	Query(word)	10
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).	50
DataCommand.cs	DatabaseCommand()	10
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	90
Sum		105
		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

- Codebase: The WordEngineering application is storable in the [GitHub.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
 - git status
 - git add
 - git commit
 - git push
- Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
- Config: The web.config file contains the database connection strings; web services user specific credentials. The system administrator at external locations may customize these information for there specific use.
- Backing services: These are external independent resources, such as the database, SMTP.

- Series of Writing

- 5. Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
- 6. Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables.
- 7. Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
- 8. Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
- 9. Disposability: The author's take on expendable work includes the following:
 - Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
- 10. Development/production parity: By first finalizing non repetitive work, the author can now focus on specialization activities.
 - The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: Dev/Ops expertise
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
- 11. Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
- 12. Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker: If the source is attributable to him, the author rarely explicitly identifies himself.

What

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

When

God gives most of His information in a dream, vision or face-to-face.
How do people place date? On each day of the week ([Genesis 1-2](#))? Seniority comes first ([John 1-15](#) [John 1-27](#) [John 1-30](#)).

Where

The author refers to the physical location or scenery of participation.

Why

The endeavor of the author is to share the word.

Artificial Intelligence

Deep Learning

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.

Machine Learning

Our entirety chiefly pertains to Him.

Multilayer Perception (MLP)

DateDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.
DateDifference.aspx is a server-side C# ASP.NET web form.
The Remember's table computed columns are Transact-SQL and SQL-CLR functions.
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.
Code re-use sounds good, but it is dependent on many factors.

Feature

He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.

Factors of Variation

These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.

Depth of the Computational Graph

The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.

Depth of the Probabilistic Modeling Graph

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.

Probability

Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is $900 \wedge (2 \wedge 8) = 900 \wedge 256 = 1.932334983228891510545406872202e+756$.

Degree of Belief

In [GetAlphabetSequence.html](#) the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.
In the BibleWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.

Frequentist Probability

In [GetAlphabetSequence.html](#) the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done ([John 19:30](#)) . [Specifications...](#) is done.

Bayesian Probability

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

Random variable

The AlphabetSequenceIndex may range between 1 and $(8000 * 26)$, 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backtrack.

Discrete

The identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary

The Testament column is either Old or New.

Ordinal

The identity columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature

The most important predictor columns are the Word, Dated, and ContactID.

Outcome

The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Davidic covenant		Psalms 89:3, Isaiah 55:3, Jeremiah 33:21
What regularity of changes?		
Event	Frequency	Scripture Reference
Creation	Daily, Sabbatical rest	Genesis 1, Genesis 2:1-3
Times of the Jews versus (VS) times of the Gentiles	490 years	Luke 21:24, Jeremiah 25:11-12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5
First resurrection	1000 years	Revelation 20:5-6
How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?		
Procedure, function or method call		Commentary
Pascal language		A procedure does not return a value, whereas a function does.
C# language	Method call	Commentary
	Instance method call	Calling a method of a class instance
	Static method call	Calling a static method of a class
	Extension method call	Calling 2026-05-25T20:31:00 an instance a static method that was added to a class
	Asynchronous method call	Calling a method and not waiting for the completion of the task
	Base method call	Calling an inherited method which may have an override clause
	Method overloading	Calling a method that exhibits the signature
	Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.
	Constructor method	To create and initialize a class instance.
	Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.
Steer		
Type	Commentary	
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.	
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.	
Structured query language (SQL)	The proposed changes which will offer query customization? • The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion. • With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.	

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associate with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URL, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence	
Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

A type of us: is a kind of us? GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript. HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration. Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML. There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kelleher).

Causation versus (VS) Correlation? Let the involvement of a personal self, resemble the involvement of a useful self.

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

Element	Commentary
Title tag	The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.
Meta Description tag	This may be upto 155 characters and it indicates the page's content.
Meta tags	The other meta names include keywords, robots and author.
Heading tags	H1...H6 with H1 being the most important.
Textual content	Search engines predominantly optimize for text. Other media are larger in size and duration. <i>When did He promise generational growth?</i> (Psalms 22:30, Genesis 3:15, Genesis 12:7, Genesis 13:15, Genesis 15:13, Genesis 15:18, Genesis 17:8, Genesis 24:7, Genesis 26:3-4, Isaiah 53:10-17)
Alt attribute on the img tag	Visually impaired people have difficulty comprehending images.
Fully qualified links	Relative links meet the author's requirement, since is hostable on external sites.
Sitemaps (both XML and HTML)	A sitemap documents the files and their relationships.

(Bruce Clay, 2022).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.

This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical preschool training and profession, begins at the ages of 25 and 30, respectively.

2024-01-06T05:43:00 *What does God choose as subject?* (John 15:15-17)

The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: ~~My Confession~~ The first word is the BookID; the second word is the VerseID.
- 3-Words: *Who is your manager?* *Crazy mister Martin.* *Mister Martin as a good.* The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.

Biblical generation - 40 Biblical years

1. 2007...2008 Common Era - the author is 40 years old: the author mentions time.
2. 2021...2024 Common Era - the biological mother of the author is 80 years old: the word recorded by the author is time relevance specific.
 - 2026-01-15T04:49:00 *You look at life...and you feel down.* A politician who is probably Bola Tinubu, said how he became a politician.
 - 2026-01-16T07:51:00 A person was making fun of Dikembe Mutombo on his draft day, Dikembe Mutombo was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.

- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing

1. Alphabet Ezechiel is the title of the algorithm which calculates chapters and verses placed forward and backward in the Bible, 2026-03-14T02:28:00 An Alfa is an Islam Moleen teacher.

2. 2026-03-14T01:56:11, I in 1000, African descent United States of America (USA) asked as mercenaries to Germany, Leviticus. And at that time, you rejoice, that the LORD, did have a heart, Father's land. Air Drop, 2026-03-14T02:28:00 In Arabic Alfa is the word for 1000.

3. 2026-03-14T20:25:05:091 I was told that an elderly male of undisclosed lineage that he wished to keep a secret was monitoring an event, Kinsman redeemer. He would come out after a side event. He naked financial loss, travel distance. A person died. I heard, air drop. I later heard.

3. 2026-03-14T02:28:00 In a form, 1 of the query options was the writing direction, and another data entry term was robotics.

1. Will the word and commentary match the AlphabetSequenceIndexScriptureReference?
2. Will the date match historical events?
3. 2026-01-06T13:56:00 You are using... the Bible... is it supportive?
4. 2026-01-20T04:00:00 Words prepare for activity.

2026-07-05T17:35:00 What did he... occur... as the same... as

2026-07-06T15:08:00 Displacement... disorderly (1 Chronicles 10:14)

2026-07-06T19:40:00 Technology... where are you? (Daniel 11:32)

2026-07-06T19:58:00 It's all... he... places.

1. I wrote the additional Yoruba alphabet with diacritical marks, a dot below, and high and low tones; and a dictionary and a translator.
2. A relational database includes related tables with primary keys, foreign keys, constraints, defaults, clustered and non-clustered indexes, views. A Client/server composed of 2 computers interacting together, with possibly an application-tier extension. During my Master's degree at the University of Technology, Sydney (UTS), I first wrote a paper on distributed databases, and finally a thesis on Client/Server.
3. During my Doctorate degree at the University of Wollongong (UOW), I researched intelligent appliances which are composed of smart cards and flash memory.

Scripture Reference Tracking

2026-06-01T03:14:00 Vocation

1. 2026-06-01T03:14:00 to the station, at a halway, I watched my twinling walk towards the north, after transport had departed, and I realized my vocation was to follow in the footsteps of my twin sibling to officiate game time.
2. 2026-06-01T08:44:00 Separated into halves – separated into twinning (Hebrews 11:23-29, Matthew 17:21, Revelation 21:22).
3. On 09/93-99/94, I watched the Swissair 2000 Swissair Domestic last selection at Circular Swissair airway status.
4. 2026-06-01T04:22:00 In an award, there may be interruptions. 2026-06-01T04:23:00 There are separation of intervals.
5. 2026-01-20T01:07:00 a male was given for officiating what I perceived to be members of the opposite gender games. I went inside a room, and as I viewed from the south-west, I saw a male standing in the center-east and on top of him, his property was labeled with his first name initial and his last name (Revelation 1:11, Revelation 1:4,4).
6. 2026-06-01T09:31:00 I was told that I was being warned me, and he befriended me that I have industry experience that it is user-experience that the interviewers will focus on. A form contains a question for the responder to specify a particular directory folder path. The British Prime Minister, Margaret Thatcher, will give a speech at a podium, and introduce her Olympic medal-winning husband, who walked from the north-center westward.
7. 2026-06-16T19:31:00 my twin sibling is learning Progress database on the job, like I fully tried to learn JavaScript at Baynet World Inc. (BayNet.com) and Daigaku Honyaku Center (DHC).
- 2007-10-25.. 2026-06-16-0609 days (18 biblical years, 10 biblical months, 29 days) (18 years, 7 months, 3 weeks, 1 day).
- 2007-10-26-06/01:16:00 What I've tried to use... how do I use it?
2. 2026-06-15T10:34:00 What's Center use? How are you after Him? (Isaiah 52:12-53:1, Daniel 9:27?)
1. I saw a hand pick to the west of the house of Wirmie, and later to the east of the house of the Hough family.
- Winnie lives at 4461 Canavassack Common, (USA) 94555, United States of America (USA).
- The Hough family lives at 4685 Lantana Common, Fremont, California (CA) 94555, United States of America (USA).
- 2023-04-06.. 2026-07-15T13:34:00 (4761 / 4685) = 2023-04-06.. 2026-07-15T13:34:00 1.06121950586897972518676675735=Date Difference: 728939 days. Interval: 105744.14005381718 Thursday October 13 2021 02:21-10-13.

1. I started with word processing, and I advanced into Extensible Mark-up Language (XML) and Extensible Stylesheet Language Transformations (XSLT), and later relational database schema.
2. In Righting Software, Juval Löwy of IDesign, prescribes grouping use-cases and their extensions.

(Juval Löwy, 2019-11-27).

1. 2026-05-29T02:31:00 There is a difference between writing an event, and associating personal testimony. There is only so much information an author can write on paper, 2026-05-29T03:17:00 and later use a computer to further his thinking. Complement, re-cap.
2. 2026-05-29T03:19:00 As could be seen from study Bibliis, 2026-05-29T03:21:00 Anthony Nwok, my colleague at Information Digital Services (IDS), a subsidiary of White International, once pointed out that I do a lot of clipboard copy and paste. Anthony never will be referring to Kowe, where I re-draw a Yoda alphabet image, whenever a user presses their corresponding Function Key.
3. 2026-05-30T13:45:00 He is not searching the Internet... he is searching... a local database. Replication from the central database, Informix to the remote database, Watcom SQL Anywhere. [Knowing your data](#).

2026-04-27T16:01:00 WordEngineering query

1. WordEngineering query - database
Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
 1. Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
 2. Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
 3. Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
2. WordEngineering query - client
Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
 1. Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
 2. Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
 3. 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 [To know at the start... what I Am?](#)

1. When I started Kowe, I was a deported Yoruba man.
 - 2026-04-27T19:59:00 This I will find useful... for my people.
 - 2026-04-27T20:13:00 I could use the computer... for my weakness.
2. When I started AlphabetSequence... 2026-04-27T20:22:00 [I must find... for what... He accumulated in the east \(Genesis 15:5, Revelation 16:12 \).](#)

1. The titles of God, and their translations ([Genesis 16:13](#)).
2. The identification of His creation. For signs, after death, substitute, beginning and end ([Hebrews 9:12](#)).

2026-04-15T05:43:00 [Feature highlight its strength and weakness?](#)

Passover: 2026-04-02, 2027-04-22.
Feast of Unleavened Bread: 2026-04-03, 2027-04-23.
2026-04-15T05:23:00 I went to a man in the south-west quarter, and I took from him, 1 piece of fish, and 1 piece of meat.
Implementation options include parsing a data definition language script file (.SQL), or interrogating the database schema.

- Cross-check that all the tables and their columns have documented entries in the data dictionary, meta-data.
- For the tables which have parent-child relationships, master-detail, make sure there are corresponding views. To determine the affected tables, check for the existence of primary keys which contain composite columns, and primary keys and foreign keys with referential integrity which protect against orphans. Suspect tables include the PurchaseOrder and PurchaseOrderItem related tables, and the Contact and its subordinate address tables.
- 1. 2026-04-15T07:42:00 Make sure that the projected and potential primary columns are not nullable, and have defaults.
- 2026-04-15T07:44:00 Natural primary key columns.
- 2. 2026-04-15T07:46:00 These are, for example, ID identity or sequential, and dated timestamp columns.

The author started receiving word from God shortly prior to his 21st birthday, which was coming up on 1988-10-15. But, the author did not start writing a blog until at about 2000-10-05. The author started using a database for data entry, and the author commenced AlphabetSequence at about 2002-12-03.

1. The author was incarcerated at the Alameda County Santa Rita Jail, 5325 Broder Boulevard, Dublin, California (CA), (925) 551-6500, 2nd occasion between 2028-03-07T00:00:00...2028-03-14T00:00:00
 2. 1. 2004-05-26T00:00:00 The author was hospitalized initially at the John George Psychiatric Pavilion, 2060 Fairmont Dr, San Leandro, California (CA) 94578, (510) 346-1300.
 2. 2004-12-02T00:00:00 And, subsequently at Villa Fairmont Mental Health Rehabilitation Center (MHRc), 15200 Foothill Boulevard, San Leandro, California (CA) 94578, (510) 352-9690.
 3. 2026-05-03T17:42:00 Information record is intermittent during trips.
 4. The computer malfunctions, and specifically, the hard disk of the computer fails; therefore, resort to restore database.

1. Pentateuch: The Old Testament starts with the 5 books of Moses.
2. Gospel: The New Testament starts with the 4 Gospels of Jesus Christ books

2026-05-04T18:05:00 The HisWorld! column is for group/simultaneous words.... most likely, that were spoken on the same dates.
2026-05-04T07:23:00 The Nigerian government versus (VS) Microsoft dispute over sexual intercourse between eligible Microsoft-affiliated females and mediocre Nigerian male partners. I saw 2 Microsoft affiliated females beside a car in the north-center-west. In the center-west, I attempted to give a Microsoft-affiliated female my business card, but she did not receive my business card, because there is no job hope ([Hebrews 11:2](#)).
2026-05-04T12:23:00 I re-located to the United States of America (USA) in my sixteenth, thirty-first, and thirty-second, 32nd, years, 1983-12-29, and 1991-01-18, respectively ([Luke 16:16](#)).

(Aileen A. Nielsen, 2020)

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about... a re-use?

The is distinct, supplements is not, and is not null, variables parameter. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webserve: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example

```

SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageTotal
FROM WordEngineering..Hisword WHERE Word NOT LIKE '[a-z]%'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageTotal
FROM WordEngineering..Hisword WHERE Word LIKE '[a-z]%'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageTotal
FROM WordEngineering..Hisword WHERE Word IS NULL
ORDER BY

```

To:
Subject: Your SQL Server background caught our RR -- 18-28 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:
 SQL Server DBA & User Support Specialist – 180% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 18-28 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

What part of the distance... as He knows?

1. Daniel M. Russell. The Joy of Search: A Google Insider's Guide to Going Beyond the Basics. Originally published: September 6, 2019
As part of the Doctoral studies of the author, he developed his expertise on the Unified Modeling Language (UML) use-cases, and sequence and collaboration diagrams.
2. What do you use? & many of its representation.
3. In Akedah, The Binding of Isaac.

There were some assumptions which were tested out (Hebrews 11:1-3).
3. How I relate as a simple example of uses (Daniel 2, Genesis 41, Genesis 4, Genesis 2:5-6, Genesis 2:18-25).

Old	New	Actor	Commentary
Work	House	Joseph	At Guaranty Trust Bank (GTB), I taught Hajara Adeola, the wife of Fola Adeola, a university French teacher at Gescro, 34 Association Avenue, Ilupeju, Lagos State, Nigeria. The Manager of Consumer Banking invited me to his house to install Lotus 1-2-3 spreadsheet for his wife and him. The Manager of Corporate Banking, George, asked me to develop a community banking software application. Fola Adeola asked me to develop a bank draft application in dBASE and Nantucket Clipper. 2026-02-10T22:12:00 What are we bring together... what are we setting apart? 2026-02-10T22:14:00 What does he want to do... as apart from you? As certain from you? 2026-02-10T22:26:00 What utterance... remain the same? 2026-02-10T22:41:00 What has God decided... for our future apart? (Genesis 11:9, Exodus 12:1)

2026-02-02T15:00:00 Naming, counting, timing, ordering, sampling

Terminology	Word	Relational database
Naming	God's first commandment to the first man, Adam, was for him to name the animals.	For a relational database, the various objects are named.
Counting	God counted the days during creation.	Count() keyword.
Timing	The greater light, the sun, and the lesser light, the moon, are signs.	GetDate() returns the date and time.
Ordering	Greatest commandment, greatest among us, honor thy father and thy mother	ORDER BY ASC, ORDER BY DESC. Lag or lead.
Sampling	Wandering years	ORDER BY newid()

2026-01-31T17:44:00 Remi Adeniji said she submitted her research thesis titled, Open-Source consistency. In the center-east, a male was taunting the Russians.

2026-02-02T20:10:00

1. Genealogy (John 3:16, Matthew 1:17)
 2. Role (Genesis 3:15, Matthew 2:2, Matthew 27:37)
- When I am doing this?
- Pre-condition (Genesis 3:15)
 - Assertion (Hebrews 5:8, John 20:17)
 - Post-condition (Genesis 49:9, Revelation 5:5)

2024-11-13T19:12:00 Translation

1. 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
2. 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (VS) Functional dynamic equivalence (thought-for-thought): Bible Word.html is the former.
3. 2024-11-15T14:06:00 Translator: The author's first program is translation of English to Yoruba.

(Tim Wildsmith, 2024).

2026-01-28T19:01:00 Analytics

2026-01-28T19:01:00 At Albertsons Lucky, Charter Square at the Bank of America (BoFA) customer service desk, the German Store Manager, John Holtz, was attending to an Asian father, older son, and younger daughter, who did acrobatics. The word came on Paseo Padre Parkway between Blackstone Way and Seward Drive, on an overhead bridge, Highway 880 south, at the south of the 1st of 4, driving lanes.
When is it all he asked for... He persuaded in doing?
New Testament

2026-01-10T10:37:00 Interpret

- 2026-01-10T04:43:00 I just saw the house of Mahdu. In the south-east, located on a support was a small black television, and there were other electronic appliances. With Hindi, in dreams, the location, artifact, and then probably the actor. Bollywood. Chemistry teacher at Baptist Academy who compared actors to also starring. Hindi are nomadic, they migrate. Other Asians are ancient, historic to Hindi realization on English people, Christianity, and Rome phase II. Dotun needs to nurture and have an impact on her church, family, and worldwide.

2025-12-20T10:43:00 Relationship between... number and the Bible?

Percentage	Commentary	Scripture Reference	Sacred Text
75%	Wo 75%	Matthew 7:10 , Jonah 3 , 1 Kings 7 , 1 Samuel 21:3	Greek Kingdom Daniel 2:38

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order: tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location — HisWord table, Word column. The surrounding related information is inferred and subjective ([Matthew 16:21](#)).

2025-12-25T21:46:00 Time to first frame

[When did He define His rule?](#) ([Genesis 18:19](#))?

1. Time to first paint: HTML presentation
2. Time to interactive: JavaScript generation of Document Object Model (DOM)

2025-12-26T21:59:00 Timeline inspector

[GetAPage.html](#) Includes performance.now() for AJAX calls 2025-12-26T22:35:00 initiation and completion. 2025-12-26T22:28:00 [We must... schedule one another... as purposely](#).

Layman	Know their God
When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases.	Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.
I used to rely on my education and experience.	Now I draw on expert opinion? 2025-12-04T22:00:00 Expert facts , 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. What resources for the other?

2025-07-31T13:25:00 [What does the link provide?](#)

1. 2025-07-31T15:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.
2. 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.
3. 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) availability? Static versus (VS) dynamic?
4. 2025-07-31T16:05:00 The iframe tag embeds one HTML document within another.
5. 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?
6. 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?
7. 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.
- 2025-12-05T06:50:00 Scene 1: I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch went drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes to Bondi Beach. Scene 3: I was trying to find the relationship between the availability of theorists and theorems.
 - 2025-12-05T12:09:00 [What did He turn to... as usage?](#) ([2 Chronicles 16:2](#))? San Jose Market Center. 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.
 - 2025-12-06T15:26:00 What does He associate... with me... and how do I be the guide?

2025-11-23T00:28:00 [What have you... used... the Bible for](#) ([John 20:31](#), [Acts 17:11](#), [John 5:39](#), [Joshua 1:8](#), [Daniel 9:2](#))?

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.

urlPerformance

1. [webpageperf.org](#) In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souder, 2016-02-10).

Microsoft SQL Server limitations include:

- [Microsoft SQL Server database connection string ApplicationIntent=ReadOnly](#)
- On the referencing side, it can only relate to a single referenced entity.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero [Zero five eight four one](#), versus (VS) [5841](#)

2025-07-30T10:22:00 **Schema changes**

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
2. The SQL Server Management Studio table design menu option provides the most flexibility.
3. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. [URIMaintenancePage.aspx.ca](#) For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 [Can I be impartial as others?](#)
 - 2007-08-04 [ExCop](#) is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines. 2025-07-14T16:50:00 [To what extent do I know the culture of others?](#)
 - [JSLint: The JavaScript Code Quality and Coverage Tool](#)
 - 2018-01-05 [W3C Markup Validation Service](#)
2. Information Hiding: 2025-07-17T20:46:00 Addressing. 2025-07-18T19:33:00
 1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
 2. 2025-07-18T19:45:00 While working on a project for Information Dialing Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload. 2025-07-18T19:51:00 0055 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/ server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 [know](#) is a writing tool... where is the speaker?
 3. During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.
 4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.
 5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.
 1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.
 2. Application: A dynamic link library [InformationInTransit.dll](#) queries the database.
 3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 [and retrieve the compared God's word.](#)

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

[Software Engineering: A Modern Approach](#) by Marco Tulio Valente. Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

1. - The user enters the word to interpret
2. - The system determines by using regular expressions the data type of the word
3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 **To replicate God's Word?**

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 [he relies on his ousance of the truth](#)

2025-06-27T20:10:00 Minimum Viable Product (MVP) and A/B Testing (or split testing)

Interest of the users									
ASP.Net Web Forms - control version	HTML5 Asynchronous JavaScript XMLHttpRequest (AJAX) - treatment version

5. 2025-05-31T06:22:00 Lazv evaluation... is a scenario for LINQ.
(Ben Weidig, 2023-05-09).
```

2025-05-15T20:10:00 How to be a SQL editor?

Instruction
Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URl and DtaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should be the custodian? Is the monitor... automatable?
lang attribute
As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
 - 1. In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
 - 2. In 2007, when I was looking for work, I modeled the IntegratedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
 - The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.
- (John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16. Leviticus 27:14. Zechariah 11:12-13.)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
 - 1. Spelling corrections.
 - 2. Verb grammar tense.
 - 3. Synonym versus (vs) opposite.
 - 4. Singular versus (vs) plural.
 - 5. Deprecated.
 - 6. Currency.
 - 7. Locality, regional, custom, preference.
 - 8. Anglicized.
 - 9. Religion.
 - 10. Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
 - 11. Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways... and when did he section ways?

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

```
SELECT HiswordID, Dated, Word
FROM WordEngineering..Hisword HiswordLead
WHERE Dated >

<u>Ken Lewis of Bank of America (BoA)</u>	<u>Kenneth Chensault of American Express (AmEx)</u>	
The fall of man	Cain and Abel	<u>Genesis 3, Genesis 4</u>
Census 20 years and older	Priesthood training commences at the age of 25 years old, and priesthood service at the age of 30 years old.	<u>Numbers 1:3, Numbers 8:24-26</u>

• At University of Life, Staff School, Stephen re-located, prior to my twin sibling and me re-locating to Lagos. Wumi Oloyede started driving us to school.
 • In Lagos, Bentolulwa graduating from Abasi Nursery and Primary School to Ikaja Grammar School, prior to my twin sibling and I attending Abasi Nursery and Primary School.
 • I lived with Romulo Lira prior to Romulo Lira passing away from Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC) and Romulo Lira returning to his home country, Venezuela.
 • I was deported to Nigeria, shortly after the graduation of my adopted mother, and shortly before the separation of Major Lawal from Aunt. Tawo.
 • Bentolulwa and Ademilulwa, Uncle Demola and Damola. You must be involved... for someone to use you. 2025-03-28T18:30:00 I consider father and son relationships. What we are... is how we are made after. I started tutoring computers to Hajara Adeola, a French lecturer, and wife of Fola Adeola, prior to Guaranty Trust Bank commencement. The only separation between the English language and the Yoruba language is the diacritical alphabets.

2025-09-14T09:24:00 Contemporary

- 2025-09-14T13:07:00 What exclusively I use? 2025-09-14T17:40:00 Naming versus (VS) Called? Referred

- How my organization is the best?
1. Alphabet places, word spelling, and sentence composition
 2. Arabic numbers systems

What measures forever?
The author is linking words spoken to related words and dictionaries

- | Word | Bible Versions | Dictionaries | Commentaries |
|-------------|---|---|---|
| Primary Key | Scripture reference | The Bible word has a place in the author's terminology, usage, retention. | Disparate scripture references which are inconsistent and non-standardized in commentaries. Not aligned with AlphabetSequence.
2024-07-13T17:01:00 Where does he see growth? |
| Proliferate | Bible publishers, versioning and language translation | Hebrew translation | Commentators |

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

The general operating system and compact database are the 2 types of authentication. (G. Taylor, 2019).

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL) a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget. Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking	Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk paging. Github.com version control. E-mail body, attachment: Internet front-end files (.html, .js, .css)	Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Focusing on the Word.

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL)

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View

2024-06-15 21:28:00 What is pertaining to the data?
 Objects to this word coming. I uploaded the 2 files from

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable

2024-06-16 16:30:00 | to who... | exchange... my good...

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model.

INFORMATION_SCHEMA offers metadata, and it is queried via SQL.

Rule 5: The comprehensive data sublanguage rule

2024-06-20T18:39:00 It looks at the data as a whole

Structured Query Language (SQL) sublanguage

Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fail in the following cases: - Primary key or unique index duplication. A primary key column may not be null. - Invalid datatype or extra large data size or out-of-range - Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in Dateofm from versus (VS) DateofUhrkt, which may result in negative date differences. The Max database will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.
2024-06-22T15:36:00 *What part of yourself... do I desire as thy future?*
Rule 9: Logical data independence:
2024-06-22T17:02:00 *The opinion of someone else... is beside me.*
Rule 10: Integrity independence:
The author is not implementing constraints.
Rule 11: Distribution independence:
The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.
Rule 12: The nonsubversion rule:
Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposeful: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man? (Genesis 2:7, Genesis 6:3.)?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

A conversion page

Customize the content of an uri? This is how the web page implements this technology. This is how-to implement it in your preferred technology.

Keyword	Find what	Replace with	Scripture Reference
Religion	Idolatry	Monothelism	Acts 7:40-43
Learning	Egyptian	Hebrew	Acts 7:22
Location	Egypt	Promised Land	Acts 7:3-7
Vocation	Ruler and a judge	Ruler and a deliverer	Acts 7:10 , Acts 7:27 , Acts 7:35

What is remembrance...associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Volume, Velocity, Variety

Unused	1544 KB												
Velocity	The author does manual data entry.												
Variety	At the beginning, the author parsed XML files into textual relational tables.												

(Jack Hyman, March 2024).

Data Types

HisWord table
Qualitative (categorical) non-numerical/descriptive - nominal (non-ordered), ordinal (orderly) or
Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
Uri	Nominal (non-ordered)
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text
Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth ([Acts 7:20](#)).
- Family ([Acts 3:31](#)).
- People ([Hebrews 1:9](#)).

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- *What I am good at doing...is what He is good at making.* (Genesis 41:32-57, Genesis 1:1-7, Genesis 4:26).
- Derivation ...variety: Processing of a word spoken by God to the author is initiated by [GetAPage.html](#)
 1. GetAPage.html serves as a gateway to specialized links.
 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: *Do you write it as a manual? Do you write it as describing the functionality.* (Daniel 9:24.)?

O t i d i computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... [Why I do it?](#)

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- *Where are the differences, comparison?*
- *Experimenting...as the same?*

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. [Singulars2](#)
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time.
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. [We all make our following.](#)
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and

- translations.

How to display the data? After determining the `AlphabetSequenceIndexScriptureReference` the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this regurgitation may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url

3. Fetching, parsing, and building the results of a web service

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8)

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
 4. GetAPage.html HisWord section: Time variant
- For a period of time, we are as we seem we are? What needs a success. (Genesis 4:7, Matthew 14:8, Mark 6:25)

(John Calvin Maxwell, 2023).

Chuck Missler of Kolnionia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Chuck Missler (version VS) the author
2018-06-02 <u>Candlelight Celebration of Life Service</u> – <u>Chuck Missler</u> Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Missler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 Stay the course. 2025-12-22T08:48:00 <u>Teaching</u> – <u>navigator</u>. 2014-08-18...2025-12-22T08:48:00=4144 days (11 biblical years, 6 biblical months, 4 days) (11 years, 4 months, 4 days) 2014-08-18 Stay the course. 2026-05-16T18:40:00 <u>What is in dispute?</u> 2026-05-28T17:17:00 The author associates Chuck Missler with teaching each story in the Bible. • Strategic trend. • Introducing other Bible scholars and mentioning their particular contributions. • Making laypeople teachers of the Bible. • Referring to terminology, Jewish history and practice, world events.	Author
2024-11-03 21:33:37.887 <u>Pattern of assembling</u>.	2024-11-03T11:58:00 <u>What we bring...as amount...to what?</u>
Chuck Missler was not listening to his own word. Chuck Missler was listening to the Word read to him.	
Chuck Missler was preaching from his understanding of the Bible.	The author is relating the word spoken to him to the Bible.
Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.	The author is relating to people. Coming from experience with people.
	<u>You were trying to reach the Bible...through your word.</u>
	<u>Interaction with Him, I start writing words received when I sleep. I introduced words when I shower.</u>
	<u>What I used, Chuck Missler used the Bible... I used myself?</u>
2025-04-09T15:30:00 <u>What did you set out to achieve as a personal notion?</u> Hal Lindsey suggested to Chuck Missler that he convert a Christian ministry hobby to a profession. Reading the Coming Prince by Sir Robert Anderson changed the plans of Chuck Missler from pursuing a doctorate degree in Physics.	2025-04-10T04:17:00 Scene 1: Lauretta is driving me, and I mentioned the first name of Nada Matjlar, but I did not disclose her last name; therefore, I am not gossiping. Lauretta plowed forward and Lauretta asked if I was talking of Nada that I now infer to be Nada Comerai. Scene 2: A man comes that he has lived in Fremont, since he moved from further away.
2025-04-10T14:14:00 <u>How the Bible can be...worth used?</u>	2025-04-10T04:46:00 <u>Limitation on person</u>. (Ezekiel 3:12-21).
2024-04-10T14:14:00 Jennifer Melow gave 2 breads burnt to Danielle Hall to warm. Jennifer Melow was also carrying meat. Albertsons Lucky, Charter Square, south-center road. <u>Casper decision?</u>	AlphabetSequence takes specific places – not of the Bible.
	2025-04-10T06:47:00 <u>When did he desire...a people as?</u> (Genesis 2:26-25. Genesis 4:3-12.)?

2022-05-26T14:05:00

What events in Abraham's life are additions?

2025-03-29T16:15:00

I am reminded of the presence of others (Ezekiel 33:17).

Word	Commentary	Scripture Reference
Partner	Sarah, Hagar, Keturah	Genesis 11:29
Pilgrimage	Canaan	Genesis 12:1-5
Guidian	Lot	Genesis 12:6-5
Possessional Blessing		Genesis 14:19
Faith	Belief in God, counted for righteousness	Genesis 15:6
Covenant	Abrahamic	Genesis 15:18
Seed	Ishmael and Isaac	Genesis 16:11
Name change	From Abram to Abraham	Genesis 17:5
Making mention at ages	75 years old when he departed out of the land of Haran, had lived in Canaan for 10 years, 86 years old when Hagar bare Ishmael to Abram, 99 years old God's request to walk before Him and be perfect, 100 years old gave birth to Isaac, 175 years lived	Genesis 12:4 Genesis 16:3 Genesis 16:16 Genesis 17:1 Genesis 21:5 Genesis 25:7
To do without someone	Separation from his wives and sons, from the physical to the spiritual	Genesis 15:13 Genesis 21:12 Genesis 22:2 Genesis 23 Genesis 25:6 Acts 7:5-6 Hebrews 11:17-19
Sarah - the first matriach	What seems natural as <i>belonging</i> ?	Genesis 18:17 1 Peter 3:6

2024-01-17T13:36:00 Alphanumeric

Date	Type	Word	Commentary
2004-07-11	Money currency	English pound 45 percent	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent 45%
2008-03-11	Calendar	September 22	

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

AlphabetSequence concerns include:

1. How essential are we to the personification of God?
2. The spirit man holds
3. When did life exchange...his view as ours (Genesis 18-19)?
4. How are we acceptable to what is new? How does God, build up, to His word (1 Samuel 9:15-17)?
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I hear; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses (Matthew 23:14 Acts 8:37 Acts 15:34 3 John 1:15)
14. Naming of words (Genesis 32:28 Genesis 35:10 Genesis 47:22)
15. We have been doing unconvincing work
16. I said, I heard, 2021-04-11T09:37:00 In a location to the North, probably 99 Ranch Market or Marina Food, or DaSo. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short.
17. What does He volunteer as time? AlphabetSequence is resource minimal:
 1. Double by hand
 2. Compute: Not technologically demanding
 3. Maturity: Since 2002
18. Separation into Segments.
19. Is this a finalized work, and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word, and not sound... by the grammatical correctness.
23. To co-operate as we are: Robert Estienne English Alphabet

2017-03-06T00:00:00 A Comparance of Age

Divided as separated. Go this way, that way.

I want to program, but I don't want to match two programs together, except for deep thought

See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt (Genesis 37:5-11, Genesis 30:24, Genesis 40-41).

Marriage

Marriage is not a practice, in the life after, resurrection (Matthew 22:30, Mark 12:25, Luke 20:35, Revelation 21:2, 2 Corinthians 11:2). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. It is more of a father that wants you, Jesus resurrected, after three days (Matthew 12:40, Matthew 26:61, Matthew 27:40, Matthew 27:63, Mark 8:31, Mark 14:58, Mark 15:29, Luke 2:46, John 2:19, John 2:20, 2 Corinthians 11:2, Revelation 21:2, Revelation 21:9, Revelation 22:12). The breaking of device (Psalms 134:20, John 19:36).

On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.

The application tier is in a dynamic link library (DLL), and it is separable into client, database, and application logics, but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.

The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenger.

Visibility (John 4)

The client is accessible from the browser; both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript.

The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3, John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?

The client started as HTML, but now has JavaScript and CSS.

CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.

JSON and XML have made in-roads.

To each resemblance

1. When His word expected mine? When I get a word from God I could do the following?
 1. Write the word in my notepad, and never refer to it again.
 2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
 3. Produce an artifact based on the word.

What do I desire...as part of significance?

1. Moses? Prophet (Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15).
2. Abraham? Seed (Genesis 17:5, Genesis 15:2, Genesis 22:7, Genesis 22:12-18, Hebrews 11:17-19).

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchical?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is search...full enough?
 1. Databases may reside inside multiple files.
 2. Although databases may store different file types. This wasn't the original intention.
 3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00

What substitution...we have ahead?

Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 2:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:27, Revelation 22:19
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

What did He find...as useful

Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: • Client/Server autonomy. Client embedded-SQL. • 1. The datetime column defaults. • 2. The identity column is auto-generable. • 3. Computed column: What can the computer do for us?
Microsoft sqcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Work	Commentary
Websites storage	folders.live.com, drive.google.com, github.com/kenadenji, kenadenji.wordpress.com
Refer to dates	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a Journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was Ite eyan mi lon to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13
Birth place	Matthew 2:6
Matriach's origin	Genesis 25:20, Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supersedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order; Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-grity.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable (1 Samuel 3:19).

Numbers in themes

- He expressed good as how He felt (Genesis 1:4, Genesis 1:10, Genesis 1:12, Genesis 1:18, Genesis 1:21, Genesis 1:25, Genesis 1:31, Genesis 2:9, Genesis 2:12, Genesis 2:17-18, Genesis 3:5-6, Genesis 3:22).
 - He expressed start and end of time (Genesis 1:1, Genesis 1:5, Genesis 1:8, Genesis 1:13, Genesis 1:13, Genesis 1:21, Genesis 1:31, Genesis 2:1-4).
 - Start of the Jews (Matthew 2:2, Matthew 27:11, Matthew 27:29, Matthew 27:37, Mark 15:2, Mark 15:9, Mark 15:12, Mark 15:18, Mark 15:26, Luke 23:3, Luke 23:37, Luke 23:38, John 18:39, John 19:3, John 19:19, John 19:21).
- To be actual things
- Pronunciation (Luke 1:13, Luke 1:60)
 - Application (Luke 1)
 - Spelling (Luke 1:63)
 - Reference (Matthew 11:14)
- In telling the future, there are two parts: prophecy and fulfillment (Revelation 19:10). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

What prize at the target?		
Prize	Target	Scripture Reference
Know.exe	Diversified language	Genesis 11:9, Revelation 7:9
http://github.com/KenAdenji/WordEngineering/tree/main/IIS/Gradual	I have decided to work on a gradual improving system.	Palms 133

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

- Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
- Selections: The particular Bible row version selections, where clauses, are built using dynamic SQL.
- Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains databtables and ASP.NET uses GridView.

This is visible in:

.aspx	.aspx.cs
http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenance.aspx	http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs
http://github.com/KenAdenji/WordEngineering/blob/main/IIS/Gradual/Contacts/ContactList.aspx	http://github.com/KenAdenji/WordEngineering/blob/main/IIS/Gradual/Contacts/ContactList.aspx.cs

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:wc
sc-status sc-substatus COUNT(*)
200 0 18515
304 0 9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.
HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:wc
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC " -i:wc

Productivity

- Productivity is the measure of unit tasks completed within a time frame or at a cost.
- A project cost is its work hours. A work day is 8 hours. A work month is ≈176 work hours. A work year is ≈2000 work hours.
- The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
- To predict productivity? Re-use.
- Metric:
 - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialization array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(De)Lean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(De)Lean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (V5) buy

(De)Lean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

- To know my part as His?
 - [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
 - [I have decided to work on a gradual improving system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? [To recognize the following as I \(2 Samuel 3:39 \) ?](#)
- [Who it comes to: \(Hebrews 11:24 \) ?](#)
- [What is the following? List of C-family programming languages](#)
- [The mechanism of selecting people?](#)
- [What notion of the same do I have?](#)
- [What I keep member of \(John 12:12 \) ?](#)
- [What did he find as suitable for him? \(Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27 \) ?](#)
- [What did he find re-occurring as him?](#) Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: 2025-07-11T18:17:00 [AJAX ... only refresh updates](#).
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript for page-specific event handlers.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file, [2432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have ... as someone else \(Mark 7 \) ?](#) 2025-07-12T16:44:00 [What did he do?](#) [How did I do? \(Luke 1:43, Luke 1:44, Matthew 3, John 3 \) ?](#)

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abimeai's Law](#) comes into recognition in [GetAPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches condusions, the author estimates further increase in load time and page size.
http://e-comfort.ephraimtech.com/WordEngineering/WordUnion/ BecauseWeAreToldThatIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreToldThatIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Unit	Value	Commentary
Internet speed test Testing download...	8.54 Megabits per second	
Internet speed test Testing upload...	4.74 Megabits per second

- When can we do without AlphabetSequence? A place in the Bible justifies the word.
 - 0 mo Banni, Clari re. You know Banni, Clari is this. We are inside a building and we heard that food is being giving away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center. 34-37 2072 sleepy. 20:13 Beni or Buki, I forget who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
- What past the time 1 (Isaiah 6:1, Luke 4:18)?
 - What is in use?
 - That chooses 1. When I read the Bible, I adapt to the role I take.
 - Relative to the word (Proverbs 3:5).
 - If the words do not join? Consider separating or putting the lesser word in the commentary column.
 - Do I determine I know?
- Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
 - If the word and scenery do not fit exactly, it may be a larger scenario.
- When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
 - What I have learnt from Bill Gates, through using the software from Microsoft.
 - Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
 - The HisWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
 - What value can we attain to this work?

2025-11-27T16:13:00 When did you differ?

2025-11-27T16:13:00When did you defer? 2025-11-27T14:50:00 Ayesha Patel of Dulhan Grocery said her parents and her maternal grandmother traveled to India for a wedding, and either in July 2025 or August 2025 her parents had previously traveled to Africa. 2025-11-26 I saw a lot of Hindi females, especially women, ordering food, and they were waiting to eat at Miki's & Honey Cafe. Deanna Carter, House Army, took their order, and she was the waitress.

1. I chose to remain and I continued living in Charlotte, North Carolina (NC), and I did not re-locate to Fort Lauderdale, Florida.

2. 2025-11-27T16:53:00 She made her arrangement known ... let us observe the revelation from God (Genesis 24:58).

2025-11-02T17:05:00 The Theory of Multiple Intelligences from Project Zero at Harvard University

- 2025-11-02T17:24:00 Bodily Kinesethetic: Body movement using the use of an interactive voice response (IVR) telephone one does through the mouth and hand fingers. The limitations of these activities include a telephone has limited keypads.
- 2025-11-02T17:39:00 A keyboard offers control keys to access all the characters – alphabets, digits, and signs. 2025-11-02T17:41:00 Voice activation should support speech correction, and confirmation, because of accent, pronunciation, improvement. 2025-11-02T17:53:00 During my time developing telephone applications, the main limitations were memory storage, archive, transcribe, addressing, and the need to offer human-computer interface (HCI) support using more interactive and extended telephone numbers (PH).

3. 2025-11-06T14:36:00 Interpersonal:
1. From his teen years, the author acquired experience with telephone conversations:
 - Local, long-distance
 - Landline, mobile
 2. Beginning with his Masters and Doctorate degree program, the author commenced writing.
 3. E-mail: March 1995 to October 1995. Since his consulting days with Sybase/Powersoft, "has sought assistance with peers. Where do I have to meet... the hope of others?"
 4. The author is not experienced with audio conferencing, video conferencing, nor computer conferencing.
4. 2025-11-08T06:30:00 Intrapersonal: When you reach a competitive edge? Italian leader north-east. 2025-11-09T09:00:00 An African-American homeless tall slim male. Timothy Knocksack, Safeway, Union Square, Union City, CA. At the intersection of Fremont Boulevard and Paseo Padre Parkway, south-east, crossing towards the north-east. Waking past B's Dumping, towards Mary's Bakery. 2025-05-26T04:43:00 My twin sibling was driving fast, and Wayne probably cautioned him. When we got our destination, I saw the same signs. Now, or prior to now, I saw the name Olavemy Adeyinka. Wale is with a Yoruba mother and daughter who were located in the center-west. The mother is probably still young, and she is wearing a head wrap with that reaches her chest. There is a fan in the south-east, and there is another fan in the north-east. Wale turns the fan on. Some male Nigerians came inside. Vividly, in the center-center, I saw an innocent man waking up a hard dress up, some thieves that were carrying guns, arms, weapons. They told him who they were, ungodly people, and they told him to depart. 2025-05-26... 2025-11-08:16:00 lives (5 biblical months, 16 days) (5 months, 1 week, 6 days)
- 2025-11-08T11:35:00 How can I use the same in a distinguishable world?
- 2025-11-08T17:09:00 How do we resume our use? Hard disk failures.
 - 2016-12-25 George Michael died. 2016-12-26T01:00:00 Georgetown.
 - 2025-09-26T05:48:00 How do National Basketball Association (NBA) draft. Chicago. Eastern European coach. Silavou Jakobs. The 2024 Liberal Democratic Party presidential election was held on 2024-09-27 to elect the next president of the Liberal Democratic Party of Japan for a 3-year term. Prime Minister of Japan. Admired on 2024-10-01. 2024-09-29 I lost the hard disk of the Dell computer.
- 2025-11-09T13:36:00 How do I discuss... who I am even with. (DNA 8:23) They were signed from God... about ending the partner relationships with Genevieve Tazzer and Pauline Beshay.

(Howard Gardner, 1983)

2025-10-23T20:25:00 Doctorate Candidate Internet Commerce

2025-10-19 Doctor Benitoluwa Adeniji asked me what I specialized in during my doctorate degree studies.

- [illegible]

2025-10-09T20:02:00 Our opinion... among others. 2025-10-09T21:12:00 What I am doing... where will you find it (Genesis 4:26)

1. Where?
- Vocation ([Matthew 4:19](#), [Mark 1:17](#).)
 - Place of origin ([Matthew 2:1-11](#), [John 7:52](#), [John 18:5](#), [John 18:7](#), [Micah 5:2](#), [Isaiah 9:1-2](#).)
 - Resting place ([Genesis 2:1](#), [Genesis 48:2-22](#), [Genesis 49:29-33](#), [Genesis 50:14-13](#).)
 - Inheritance ([Exodus 44:28](#), [Isaiah 53:10](#).)
 - City of Refuge ([Joshua 20:7-8](#), [Numbers 35:15](#).)
- The author started his tertiary education at Central Piedmont Community College (CPC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
1. Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
 2. Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
 3. Using the JavaScript fetch keyword, the author places webservice requests.
- All the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps.
1. 2025-10-09T20:35:00 places enormous responsibility on the author.
 2. 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-giving talent... it is okay.
 3. 2025-10-09T20:46:00 How do they... pursue the level... you have attained?
4. 2025-10-09T20:52:00
- When the author attended University of North Carolina, Charlotte (UNC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
 - 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible...revere itself (Numbers 11:16, Acts 6)

2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.

- 2025-10-09T02:01:00 This is where I want to be... if I am with you.
- 2025-10-09T02:10:00 Do you place a life... apart from you?

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself

1. During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions

Considering processing and storing

How can I pass knowledge...as sharing (Genesis 2:7, 2 Peter 1:21)?

- Computers consist of microprocessors and memory. A memory is either:
 1. Read only memory (ROM)
 2. Random access memory (RAM)
 3. Hard disk
 - Object-orientation combines code with data.
 1. Code - method
 2. Data - field or property
 - A relational database offers the opportunity... to program and store data.
 - The ID attribute in HTML files for url hashing is case-sensitive, and it serves for spot reference, and while it is a fragment address, it is the entire url. A relational database may support the like and between keywords for the partial and range restrictions respectively. Go to se range checking. It cannot do range checking. There are no abnormality in certainty.
- What mentions the name?
- Variable and relative? Time, number (Genesis 1:1, Genesis 1:16, Genesis 2:2-3, Genesis 2:16-17).
 - Constant? Name (Genesis 2:19-23, Exodus 3:14).

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to reorgantize the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the FromUntil Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation.

The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore nor standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament

our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their *supportive* collaboration, to the utterance the author hears; these are linkable for historical evidence.

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truths are actually realizing the dream. In my case, when I try to recall, the past. I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have

higher importance and closer affinity: so also, prophetic application, have standard occurrence.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro (Daniel%2012:4

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to

overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement (Revelation 3:7, Revelation 5:5, Revelation 22:16). Joseph (Genesis 37:2, Genesis 37:9, Genesis 37:19, Genesis 39:12-18).

Why we Accumulate the Same (Matthew 26:53, Revelation 9:16, Revelation 7:4-8)

Samuel anointed David, during king Saul's reigns. The choice, one makes, ahead (Genesis 2:2-3, 2 Samuel 11:4, 2 Samuel 12:24, Ruth 3:1, Ruth 3:8, Ruth 3:18). Knew versus lay.

Wanting a Member of...

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning.
In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.
When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.
What relates a place... as one another? Observation of a particular use?

Place	Actor	Scripture Reference
Garden of Eden	Adam	Genesis 2:8, Genesis 2:10, Genesis 2:15, Genesis 3:23-3:24
Field	Cain and Abel	Genesis 4:8-4:15
Land of Nod, on the East of Eden	Cain	Genesis 4:16
Enoch	Cain and Enoch	Genesis 4:17

What right of things?	
Word	Scripture Reference
Work word	John 14:10
Character	
Timeliness	Deuteronomy 18:22

The business of telling us apart?

Word	Scripture Reference	Commentary
Naming	Genesis 2, Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?	
Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did He see as His? A remodelled of the last (Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14)?
The author will want a conciliation with time?
AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?
That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God (Genesis 3:8)?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <https://github.com/KenAdenji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated itself. The author suggests that Baptism of the Holy Spirit (Acts 1:2), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

Keyword	Scripture Reference

Create implementation material	Technical Writer	Project Manager	Business Subject Matter Expert (SME), Technical Personnel	

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Experiences
- Background
- Prospects and Fulfillment
- Autobiography
- Style of Writing

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	BallFactory.java
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Travin).

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.
A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.
Comments do not impact pragmatically, they only serve as guides for readers.
A directed relationship may exist between a collection of source and target.
A namespace is a container separator.
An import facilitates the admittance of an external namespace.
Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66.
A constraint represents the range of valid values that a member may have.
A dependency replicates changes between the supplier/client.

Value

Lack of a value is null. A data type may place its own degree of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime.
A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators.
An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse.
A Boolean is either true or false and it is normally used for validation.
A real is a number with decimal relevance, such as ratios and percentages.

Classification

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceHelper.cs Exact.cs](#).
The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, IScriptable [UtilitySQLServerManagementObjectsSHO.cs](#). A child may override a parent's virtual member.
In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods.
Signals and receptors are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally.
Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form matured from code-behind to code-behind.
For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule.
In C# version 9, a method may offer a covariant return type.

What part of me?

- When making man, God made some choices?
 - Form: In His image
 - Location: Garden of Eden
 - Vocation: Caretaker
 - Helper: Eve
 - Model: First man, mother of all the living.
- How can we resemble His use?
 - As a software engineer, I replicate my work.
 - When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
 - I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
 - I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
 - Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike (Exodus 2:18.1?)

There are duplicates in the Bible.

Type	Commentary
Name	Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2 Samuel 12:24, 2 Samuel 12:25, 1 Samuel 25:5, 1 Samuel 25:25). - Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes names - Name changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle Paul - Name misspelling, Rahel for Rachel. A rewording of your view. - Referring to people with their alias, sons of Zebedee, sons of Thunder, Boanerges - Multiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple
Historical Account	- Deuteronomy - Remembrance - Monarchy - Kings versus Chronicles - Gospels - Our LORD's, life story - Apocalyptic - Daniel versus Revelation
Quotation	- Retelling previous events - Prophecy fulfillment - Answers based on scripture
Discrepancy between question and answer	Joshua 5:13-15
Canaan words repetition?	Genesis 12:5

These duplicates may introduce statistical error and require clarification.

2025-04-30T04:03:00	Bible relational database mapping.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1). God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many?

When our adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

- My counteract has yours.
- The tool a man... has render as Himself (John 16:7, Matthew 16:18, John 4:14, John 6:35, Matthew 26:17-19) ?
- What did they produce (Genesis 4) ?
- Specialty of view (Genesis 12:11, Genesis 13:10, Genesis 22:14) ?
- 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
- 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

2025-04-25T10:53:00 What attribute the word? Autobiography... tying it into Biblical event.

Entity-Relationship Model

2024-11-05T02:41:00 **Who's personally... the story?** The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... **What does I have not?** 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 [To delegate the user?](#) 2024-11-05T05:13:00 [Not looking hinder... but looking forward.](#)

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit [data entry is done, punctually](#), SQL Server is a service.
2. 2024-11-03T04:52:00 Significant: [What you do with so ever?](#) Microsoft SQL Server Management Studio.

(Allen G. Taylor, 2024).

2024-10-28T05:14:00 **What are compatible... within my part?**

In looking at the Bible, a decision was made to separate it into 2 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moslems, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 **A decision has to be made on your part... to follow the truth.** 2024-10-28T06:06:00 **What input has He contributed... that should be my output?** I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 **We have to accept... we are no.**

The 3 private sectors jobs I held in Charlotte, North Carolina (NC) were:

1. At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At McKey Real Estate, I worked on a R-base 5000 application.

These 3 non-academic Central Piedmont Community College (CPC) tutor jobs offered me the opportunity to complement my programming career with writing.

2024-10-19T03:08:00 **What is suitable... for replacement?**

Initially, I registered the trademark, WordEngineering. After offering me a book, Ocean Senior, I afterwards, was issued the domain name, [www.JesusInTheLamb.com](#). ([Revelation 21:23](#), [Revelation 21:2](#), [Revelation 2:17](#)). At Baynet.com, I learned how to use Microsoft VisualStudio, and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honyaku Center (DHC). I also copied code from ASP.NET Unleashed by Stephen Walkers. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with it Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). 2024-10-19T03:47:00 What obviously did He use... to later Him? Web HTML, you have elements and attributes. Choosing... to place alike. I personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 **As a result of whom?**

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.
- 2024-10-17T21:38:00 **I take the spirit... into human terms.**
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 **Beloved, neglected... your striking understanding can never be underestimated.**

- God chooses people to work with. For example, Abraham ([Exekiel 33:24](#)).
- Consistency with the Bible ([Genesis 25:23](#))?

How they report you?

- 2007-03-14 Chester Gordon Bell [http://research.microsoft.com/bac/mediapreance/MyLifeBites.aspx](#)
- 2019-12-07 [http://google.com/books/edition/Design+for+How+People+Think/UP5ODwAAGBA7Nl=em&pg=1&printsec=frontcover](#)

Separating realizable

- Baptism of John... Baptism of the spirit ([Acts 2:1](#))
- Dead... resurrection ([Hebrews 11:12](#))
- Iahy, husband ([Isaiah 2:16](#))
- Antichrist ([2 John 1:7](#))

No separation... in bonding. What did He ask for unity in? Land, man, Man, brother.

- God: Garden of Eden - Adam and Eve, Cain and Abel ([Genesis 2:8](#), [Genesis 2:15](#), [Genesis 3:23-24](#), [Genesis 4:10-17](#))
- Jesus Christ: Church - Peter ([Matthew 16:18](#))

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 **What did he find himself supporting?**

2024-11-14T18:38:00 **What... do I have for the vocation I participate in.** ([Numbers 3:8](#), [Numbers 24](#), [Romans 1](#), [Acts 13:38](#))?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years ([Genesis 15:13](#), [Acts 7:6](#))
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau ([Genesis 25:28](#), [Genesis 27:5](#), [Genesis 28:22](#), [Genesis 31:38](#), [Genesis 31:41](#))
- Children and grandchildren: Benjamin, Joseph, Judah ([Genesis 42:36](#), [Genesis 43:14](#))

This word must make remainder necessary. Does He use people as Him?

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27 , Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2 , John 3:16 , John 3:18 , Hebrews 11:17 , 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1 , Acts 13:22	1

2024-07-21T19:07:21 President Joe Biden **Where I feel... we have opportunity?**

- **What the society produce? What the society produce... what can happen?**
- Ratio percentage versus (VS) quantity? At 3 for 97 GroupPrice.com
- In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle

Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.

- Timeliness (Genesis 5:1, Daniel 5:11, Daniel 5:26, Daniel 5:30-31, Genesis 4:3, Genesis 4:8, Genesis 4:12-14.)
- Quantification (Daniel 6:5.)
- Original self (Daniel 5:17.)
- How we let him know (1 Corinthians 5:7, Acts 23:5.)
- I want not a...
- I want not a... user meaning there are...

A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming (Genesis 2:19-20, Genesis 2:23, Genesis 3:20, Genesis 4:1, Genesis 4:25-26.)
 - Reverence (Genesis 4:26, Exodus 20:7, Deuteronomy 5:14.)
 - Interpret (Genesis 37:9, Hebrews 11:23-30, Daniel 5.) to each entirely its own.
- 2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.
1. 2024-07-12T06:25:00 How much period... we have the same?
- Telvis integrates programmable script and audio recording. MP3 is an industry standard.
 - The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give descriptions?

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- An association of being alike... is the assurance of the same.
- The continuation of myself... is all I am allowed.
- One side... the decider.

1. IBM PC compatible:

At Central Piedmont Community College (CPOC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.

- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE

2. IBM employee:

- In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How to verify the work of the spirit?

- Is it compatible with the Bible (John 10:30, John 17:22, 1 John 5:8.)?
- Is this a link (Genesis 41:32, 1 Corinthians 15:45, Acts 9:3, Genesis 5:3.)?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How is a result of what?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect... out of the Bible (Daniel 5:31)?

- When is the Bible specific about time (Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54.)?

How admissible is the word (Genesis 41, Daniel 2)?

GoldPaye.html depends on the word.

What did I fit into a place?

- Ark of the Covenant
- Temple
- Jerusalem
- Judah
- Israel

What did He see Himself as?

- Joseph (Genesis 37:9.)
- Moses (Acts 2:25.)

Robert Law Joss

- 2024-06-05T04:49:00 Technically... reliable? Maturity... saturation? Information Age, personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), labor, cost, support, manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.
- 2024-06-05T04:49:00 What do we deserve as our own... what do we reserve as others?
- 2024-06-05T04:49:00 Are we doing... the part of God? 2024-06-05T04:49:00 What was I working for? 2024-09-16 Bob Joss said North Atlantic Treaty Organization (NATO). 2024-06-05T05:07:00 Hmm. We're having trouble finding that site. We can't connect to the server at www.google.com. If you entered the right address, you can: Try again later Check your network connection Check that Firefox has permission to access the web (you might be connected but behind a firewall) 2024-06-05T05:25:00 2015-10-23DoctoralDissertation.pdf 27 pages. Is America a godly nation? Is NATO a godly organization? 2024-06-05T05:44:00 E:\WordEngineering>git push fatal: unable to access 'https://github.com/KenAdeniji/WordEngineering/': Could not resolve host: github.com 2024-06-05T06:08:00 http://en.wikipedia.org/wiki/The_Network_is_the_Computer 2024-06-05T06:23:00 Is Microsoft on the network? 2024-06-05T06:24:00 faeces. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55.053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

What offering I have for people?			
Speak face-to-face	Dream or vision	Commentary	Scripture Reference
Moses	Other prophets	Leader	Numbers 12:6-8
Jesus Christ	Other teachers	Authority	Matthew 7:29

What does life involve?		
Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress (Luke 1:1-4, Daniel 9:22-23)?

- 1...many (Genesis 1:16, Genesis 1:26-2:4, Daniel 9:2.)
- More at the same (John 15.)

When did Israel seek no region... as its own (Acts 1:6)?

- The prophets
- New Testament
 - The Gospels: King of the Jews, the disciples
 - Pauline Epistles, General Epistles
 - Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have storaged using people as myself.

- The database is not currently multi-ten. The Hoivord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.

2024-11-20T05:38:00 Ordering

2024-11-20T07:59:00 Do I make a separation between physical and spiritual?

- Forerunner: Jesus and John the Baptist (Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13.)
- Levitical priesthood (Hebrews 7:16, 1 Samuel 3, Numbers 3.)
- Sitting on a high place: Humble... exalt (Luke 14:7-11.)
- Baptism: Washing of feet (John 13.)
- Marriage: Younger before the firstborn? (Genesis 29:26.)

What will count... forever?

Word	Scripture Reference
Believer in Jesus Christ	John 11:26
Kingdom of God	Daniel 2:44-45
Charity	1 Corinthians 8:1, 1 Corinthians 13:1, 1 Corinthians 13:2, 1 Corinthians 13:3, 1 Corinthians 13:4, 1 Corinthians 13:8, 1 Corinthians 13:13, 1 Corinthians 14:1, 1 Corinthians 16:14, Colossians 3:14, 1 Thessalonians 3:6, 2 Thessalonians 1:3, 1 Timothy 3:15, 1 Timothy 4:12, 2 Timothy 2:22, 2 Timothy 3:10, Titus 2:2, 1 Peter 4:8, 1 Peter 5:14, 2 Peter 1:7, 3 John 1:6, Jude 1:12, Revelation 2:19
First resurrection	Revelation 20:5-6
Promised Land	Revelation 3:12, Revelation 21:2
Messianic Covenant	Jeremiah 31:31-33
Divided according to the children of Israel	Deuteronomy 32:8

What I use people for (Job 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to, that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2).

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.

2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said: What are the other activists of God? The spirit of God moved. He saw it was good (Genesis 1). When one finds good? That is the meaning (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). We demonstrate, how we are. It is not misleading... That is the decision (Revelation 12:10). Appreciate as (Matthew 16:18).

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11, Genesis 3:15
Lead	Matthew 23:9, John 15:15
Interval	Hebrews 11:39-40

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present (Deuteronomy 32:8)?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way (Genesis 1:26).

- Father; Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	Genesis 1:26-27
Adam	Helper	Genesis 2:18-25
Eve	Seed of the woman	Genesis 3:15
Leader	Successor	Acts 26:22

What is according to time?

Word	Scripture Reference	Commentary

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I spoke to task.		
Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38
Redemption	Image of the Son	1 John 3:2

Do you know mine? (Deuteronomy 18:15)		
God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)
Place of Origin	Egypt (Exodus 2:19)	Bethlehem (Matthew 2:1-18, Luke 2:1-20, John 7:42)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place grouping... man grouping... 2025-04-1804:06:00 (Genesis 48:4)?

2025-04-1706:16:00 Do we choose... a realization of him?

- 2024-07-09T18:30:00 He has always out it in... context of time.
- 2024-09-15T13:39:00 How our part... is never... design as lasting?
- 2022-08-08T19:00:00 Disposition the Devil?
- 2024-07-23T09:22:00 To be an African's... nation.
- 2024-09-24T11:01:00 I have brought shame to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overland bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
- 2022-10-08T11:08:00 To work as a part of Me?
- 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestines?

Associated culture

- 1. Associated culture (Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5)

What I am rendering? To what particular use... is me (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45)?

What is the reward of the past?

From that day (1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53)...

1. Salvation (Exodus 14:13)
 2. Commit (Luke 23:46, Psalms 31:5)
- What personifies the time?
1. First and Last Adam (1 Corinthians 15:45)
 2. Firstborn (Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23)
- What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11).
- Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love babe I won... Including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness. (1 Timothy 6:17).

How do you reference the Bible?		
Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:24-27, Matthew 5:18	Iota

Words are way.

Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17, Genesis 3:3-4, John 12:34
Babel	Genesis 11:9
Stricter versus (VS) flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count

Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:21-22

Phases of Life

Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 2, Hebrews 11:25

What is the Bible divisible to?

Word	Reference
Heaven versus (VS) Earth? Salvation	Genesis 1:1, John 4:22
Dead versus (VS) Alive? Spirit	Genesis 1:2
Water versus (VS) Land? Israel	Revelation 17:1, Revelation 17:15
Prophecy versus (VS) Fulfillment? Word	Lamentations 3:37

Who am I after?

Word	Scripture Reference
Birth right	Genesis 25:31-34
Genealogy	
Blessing	1 Chronicles 5:2
Avenger of Blood	Numbers 35
But we see Jesus, who was made a little lower than the angels for the suffering of death, crowned with glory and honour; that he by the grace of God should taste death for every man.	Hebrews 2:9
Disciple	Acts 22:3
Forerunner	

What spirit to say?

Word	Scripture Reference
Holy Spirit	Genesis 1:2, John 4:24, Genesis 6:3, Genesis 41:38
Evil spirit	Judges 9:23, 1 Samuel 16:14, 1 Samuel 16:15, 1 Samuel 16:16, 1 Samuel 16:23, 1 Samuel 18:10, 1 Samuel 19:9, Luke 7:21, Luke 8:2, Acts 19:12, Acts 19:13, Acts 19:15, Acts 19:16
Lying spirit	1 Kings 22:22-23, 2 Chronicles 18:21-22
State of spirit	Genesis 45:27, Exodus 6:9, 1 Kings 10:5, 2 Chronicles 9:4

Word opposites

Word	Reference
Anti	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, Revelation 2:13
Un	Ungood, unholy, unrighteous

Beyond association of time, where am I?

Word	Scripture Reference
Role	Genesis 32:28
Place	Matthew 23:37
Times	Luke 21:24
Language	Genesis 11:9

Rajeev Kame telephone interview, What iterate a place?

Word	Scripture Reference
Alter	Acts 6:13-14
Iterate	Jeremiah 25:11-12, Jeremiah 29:10
Utilize	Numbers 35:25, Numbers 35:26-28, Numbers 35:32, Joshua 21:13, Joshua 21:21, Joshua 21:27, Joshua 21:38, 1 Chronicles 6:57
Utter	Judges 12:6

Why numbers are preferred?

Word	Scripture Reference
Divine	Genesis 41:32
Alphanumeric	
Multi-Lingual	Psalms 81:5

A remembrance of Himself in us?

Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How to have association, with guidance?

Word	Scripture Reference
Greatly beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Birthright	Daniel 1:3-4
Marital bestowment	Ruth 2:10

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	Amos 3:7
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?
- What does the want as a self? O pe. In Youtube?
 - Complete
 - Late
 - Call
 - Thanksgiving

What did He see Himself as?

What did He see Himself as?	
Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

- There is more to you...than you are ([Ephesians 3:18](#)).
- We want personal data, when is public data sufficient?
- From...Until AlphabetSequence
- God expressed His wish for me
 - God spoke intermittently
 - God explicitly mentioned about some of the specific people that were in my life
 - To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
 - God did not initially identify Himself, with a particular name
- The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31 Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- [Quality Assurance](#)
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [JSMin](#), [FxCop](#)
- Questionnaire: [RatingBank](#) [InDefine](#)

Prepared for Time

On 2019-04-04T09:00:00 [andre.nguyen@gogcm.com](#) will telephone me about the role with Google's co-founder Larry Page [jgbs.lever.co/0itvhwms.aers/201c6d9a-2d8a-4727-a345-d4a93d6dc277?necsvId=3b8e0b44-7127-4709-ad21-6ebb8a5f7403](#) Andre Nguyen asked how I spend my day? 2026-01-19T11:32:00 [You have tried to supplantment...what God has given you.](#) 2026-03-07T11:24:00 [He continues...and as I was reading the Bible... He was giving me a word.](#)

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. [How relevant is Your word to our opinion?](#) This projection may result in entries of new records in the Remember and APass tables. [Where are people, his relation?](#)

[However, he is present, that is how I use.](#)

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555

[How do we develop...our east time \(\[Genesis 37:19-20\]\(#\) \[Daniel 6:5\]\(#\) \)?](#)

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

[What we do minimally, is how we do enormously.](#)

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- [ScriptureReference.html](#) Requires Bible knowledge and place in the Bible.
- [BibleIndex.html](#) Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance ([Matthew 10:19-20](#)).
- Where am I, resemblance of how I am made ([1 Corinthians 14](#))?

What does He choose as example?

- God rested on the Sabbath day ([Luke 23:56](#))
- Jesus Christ ([Daniel 9:24-27](#) [1 Corinthians 15:45](#) [1 Corinthians 15:47](#))
- Man such as King David ([2 Kings 14:3](#) [2 Kings 16:2](#) [2 Chronicles 28:1](#) [Amos 6:5](#))
- Place such as Sodom ([Matthew 10:15](#) [Matthew 11:23-24](#) [Mark 6:11](#) [Luke 10:12](#) [Luke 17:29](#) [Romans 9:29](#) [2 Peter 2:6](#) [Jude 1:7](#) [Revelation 11:8](#)).
- Other living things ([Numbers 22:21-33](#)).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy ([2 Samuel 12:14](#)). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence ([Isaiah 23:15](#) [Isaiah 23:17](#) [Jeremiah 25:11](#) [Jeremiah 25:12](#) [Jeremiah 29:10](#) [Daniel 9:2](#) [Zechariah 7:5](#)). Listed below are some of the repeated reinforcements.

1. [GetAPage.html](#)
2. [BibleWord.html](#)
3. [ScriptureReference.html](#)
4. [DateDifference.aspx](#)

24. Department of

The document that the reader is currently reading, uses rudimentary formatting and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions. Based on the user's request, the application generates the result sets, on-the-fly.

The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and it gives us the opportunity to test our Microsoft implemented software in a non-proprietary and supported environment. For compatibility with standard, the author performs tests on Microsoft's Internet Explorer (MSIE), Google's Chrome, Apple's Safari browser.

HyperText Markup Language (HTML)

The document that the reader is currently reading, uses rudimentary formatting and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions. Based on the user's request, the application generates the result sets, on-the-fly.

HyperText Transfer Protocol (HTTP)

The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and it gives us the opportunity to play with it. Since the Internet started to become a mass, most of them are not willing to pay for something without standard, the author performs a bit of a Mission Statement (MIS) - Google Chrome, Mozilla, Internet Explorer, and Safari.

The author use Microsoft Internet Information Server (IIS), the author has experience with both the Apache HTTP Server, Apache Tomcat Server. The author preference for IIS, includes its tight integration to the Windows Operating System, SQL Server and .net framework.

This is the amount of time, it takes to respond to request. The use of AJAX, helps to decrease the duration, the length of time, it takes to load-up a page

This dissertation depends on the structural navigation links for the table of contents. The associative links help to drill-down to particular scripture reference and Bible words. The author also lists, outbound links, re-direct to source web references, as in the bibliography section. Registration with search engines is one of the ways to encourage incoming links.

Machine Learning

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P, if its performance at tasks in T, as measured by P, improves with experience E (Goodfellow et al. 2016). Machine Learning takes as input: data and answers and derives rules (Blesch et al. 2020).

Page Size
The HTML file sizes are small; since the author distributes the work between HTML, JavaScript, CSS and the back-end source files

The page title is a microcontent that serves as a prominent content in search engine listing, bookmarks, history lists and the page header on the browser.

Semantic HTML
This is the choice of a particular HTML tag, to reinforce its meaning and content.

Server-Side Program

Ever circulating

Style Sheet

Diagrams

The diagram illustrates the Factory Method pattern. It shows a hierarchy of classes and how a method in a base class can create objects of different subclasses based on a parameter.

Classes and Their Attributes:

- Man** (Base Class):
 - name: Adam (prototype)
 - Object prototype
- Woman** (Subclass):
 - constructor: Woman()
 - Man prototype
- Man prototype** (Base Class):
 - name: "Adam"
 - father: "God"
 - mother: null
 - title: "Mother of all the living"
 - vocation: "Helper"
- Woman prototype** (Subclass):
 - name: "Eve"
 - father: null
 - mother: null
 - title: "Mother of all the living"
 - vocation: "Helper"
- Man (prototype)** (Base Class):
 - name: "Adam"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Father of the ground"
- Woman (prototype)** (Subclass):
 - name: "Eve"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Father of the ground"
- Man (prototype)** (Base Class):
 - name: "Adam"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Father of the ground"
- Woman (prototype)** (Subclass):
 - name: "Eve"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Father of the ground"
- Man (prototype)** (Base Class):
 - name: "Adam"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Father of the ground"
- Woman (prototype)** (Subclass):
 - name: "Eve"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Father of the ground"

Method Calls and Object Creation:

- Man** (Base Class) has a method **createMan()** that returns a **Man prototype**.
- Woman** (Subclass) has a method **createWoman()** that returns a **Woman prototype**.
- Man (prototype)** (Base Class) has a method **createMan()** that returns a **Man (prototype)**.
- Woman (prototype)** (Subclass) has a method **createWoman()** that returns a **Woman (prototype)**.
- Man (prototype)** (Base Class) has a method **createMan()** that returns a **Man (prototype)**.
- Woman (prototype)** (Subclass) has a method **createWoman()** that returns a **Woman (prototype)**.

Diagram Flow:

- Man** (Base Class) has a method **createMan()** that returns a **Man prototype**.
- Woman** (Subclass) has a method **createWoman()** that returns a **Woman prototype**.
- Man (prototype)** (Base Class) has a method **createMan()** that returns a **Man (prototype)**.
- Woman (prototype)** (Subclass) has a method **createWoman()** that returns a **Woman (prototype)**.
- Man (prototype)** (Base Class) has a method **createMan()** that returns a **Man (prototype)**.
- Woman (prototype)** (Subclass) has a method **createWoman()** that returns a **Woman (prototype)**.

```
@startuml
Adam -> Eve: Knew
Eve -> Cain: Bare
Eve -> Abel: Bare
Abel -> Sheep: Kept
Cain -> Ground: Tillage
Cain -> God: Sacrifice
Abel -> God: Sacrifice
God -> Abel: Respect
God -> Cain: Reject
God -> Cain: Admonish
@enduml
```

[illegible]

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
- 1. An African American female senior, Gayle.
 - 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
 - 3. Michael Pike, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - 4. My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning, 2024-12-25T22:00:00 What entranced, of the news?
 - 5. I wanted to build a traffic light for the intersection of 10th and 11th.
 - 6. In a multicultural church where I was part of the congregation, Bernie Alspaugh mentored. Perry drove me to church. I went to altar calls for maturation prayers.
- 2024-12-25T21:12:00 When I had the option, I have accommodated.
- 2024-12-25T21:29:00 Australia had brought me in, to fit into the crowd.

What role he played in your life?

They had varying mother... but one father (Genesis 32:28).

2024-12-31T16:48:00 Hst Location: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.

2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?

1. Post-1988 re-education from the tie to the

2. Patrick, brother Yemo

3. Captain of the Nigerian national hockey team

4. Teacher for the 14 year of the Baptist Academy secondary school, evening schedule

5. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5

2. Post-1988 deportation: You called him Daddy, that is what everybody else called him

• Where did he serve... a quote?

• Where did I... remove myself from the past? (Genesis 31:41)?

• What went... are new?

• Spending time... to reality?

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 - 1. In the year 2024, the author will turn 57 years old.
 - 2. In the year 2024, Faith An Yao will turn 18 years old.
 - 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
 - I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 × 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has He made? (Genesis 32:28. Genesis 5:3. Genesis 4:17.)? What word reminds? (Mark 11:23.)?
5.

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
- The author was receptive and felt most at home during worship.

(Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent, where is it needed?
